| (Ledoux.). (ix, 1890)                                                                                                 | 565  |
| Phosphate Lands in. (T.R.) (x, 1891)                                                                                  | 393  |
| Flour, Alum in, Detection of. (Herz.). (vi, 1887)                                                                     | 51   |
| And Bread, Adulteration of. (xi, 1892)                                                                                | 172  |
| Appliances for Testing Properties of. (P) Hogarth. (xi, 1892)                                                         | 629  |
| Detection of Wheat, in Rye Flour. (Kleeberg.). (xii, 1893)                                                            | 466  |
| Determining Stiffness of Paste from. (Thomson.). (v, 1886)                                                            | 143  |
| Manufacture of. (P) O'Callaghan. (xiv, 1895)                                                                          | 1058 |
| Manufacture of Wheat. (P) Amos. (xi, 1892)                                                                            | 629  |
| Preparation of. (P) Jones. (xii, 1893)                                                                                | 1051 |
| Presence of Alkaloids in Old. (Balland.). (v, 1886)                                                                   | 171  |
| Self-raising. (P) Wagar. (xii, 1893)                                                                                  | 370  |
| Suitability of, for Baking. (x, 1891)                                                                                 | 1020 |
| Flours, Analysis of. (Balland.). (xiv, 1895)                                                                          | 379  |
| Rich in Diastase, Utilisation of. (P) Briant and Walker. (xii, 1894)                                                  | 55   |
| Flowers, Fruit, &c., Extraction of Perfumes from, and Apparatus therefor. (P) Thompson. From Nellensteyn. (vii, 1889) | 133  |
| Production of Perfume in. (Mesnard.). (xii, 1893)                                                                     | 372  |
| Flue-Dust, Analysis of. (i, 1882)                                                                                     | 384  |
| Collection and Treatment of. (P) Barclay and Simpson. (iv, 1885)                                                      | 351  |
| Flue Gases, Determining Acidity in. (Younger.). (vi, 1887)                                                            | 347  |
| Flues, Fireproof Cement for. (P) Taylor. (xii, 1893)                                                                  | 355  |
| Prevention of Emission of Vapours from. (P) Cook. (iv, 1885)                                                          | 363  |
| Fluid, Cleansing, Manufacture of. (P) Green and Needham. (v, 1886)                                                    | 165  |
| Apparatus for Determining the Relative Percentages of Fluid Components of a Compound. (P) Berg. (xii, 1893)           | 548  |
| For Preventing Incrustation. (P) Coslett. (viii, 1889)                                                                | 971  |
| Specific Gravity, Determination. (Alder Wright.). (xi, 1892)                                                          | 207  |
| Tempering, for Treating Steel. (P) Tweedy. (x, 1891)                                                                  | 145  |
| Fluids and Solids, Automatic Separator and Purifier of. (P) Maignen. (viii, 1889)                                     | 379  |
| Apparatus for Carbonating Semi-. (P) Riley. (iv, 1885)                                                                | 535  |
| Apparatus for Centrifugal Separation of. (P) Bergh. (viii, 1889)                                                      | 530  |
| Apparatus for Condensing, Cooling, &c. (P) Breze. (viii, 1889)                                                        | 271  |
| Apparatus for Cooling, &c. (P) Downing. From Weickmann. (xiv, 1895)                                                   | 560  |
| Apparatus for Distillation of. (P) Pettigrew. (xiii, 1894)                                                            | 734  |
| Apparatus for Distillation of Ammoniacal. (P) Davis. (vii, 1888)                                                      | 749  |
| App. for Estimating Glucose in. (P) Gerrard. (ix, 1890)                                                               | 774  |
| Apparatus for Evaporating, &c.:                                                                                       |      |
| (P) Chamberlain and Davis. (ix, 1890)                                                                                 | 1115 |
| (P) Theisen. (xiv, 1895)                                                                                              | 792  |
| Apparatus for Filtering:                                                                                              |      |
| (P) Capitaine. From Moeller. (iv, 1885)                                                                               | 196  |
| (P) Weddell. (iv, 1885)                                                                                               | 240  |
| Apparatus for Forcing, by Compressed Air. (P) Johnson and Hutchinson. (v, 1886)                                       | 368  |
| Apparatus for Forcing Semi-, into Filter Presses. (P) Johnson and Hutchinson. (x, 1891)                               | 529  |
| Apparatus for Heating and Cooling. (P) Fitzpatrick. From Kleemann. (xii, 1893)                                        | 436  |
| Apparatus for Heating by Steam. (P) Frazer and Welch. (i, 1882)                                                       | 96   |
| Apparatus for Heating, Cooling, or Condensing. (P) Rathbone. (viii, 1889)                                             | 379  |
| Apparatus for Indicating Temperature, &c., of Confined. (P) Thomson. (vi, 1887)                                       | 183  |
| Apparatus for Induction of. (P) Morton and Thomson. (ix, 1890)                                                        | 379  |

| Fluids—cont.                                                  | PAGE                               | Fluorine—cont.                                                | PAGE              |
|---------------------------------------------------------------|------------------------------------|---------------------------------------------------------------|-------------------|
| Apparatus for Measuring. (P) Wüster. (v, 1886) .....          | 235                                | Manufacture of Double Salts Containing. (P) Thompson.         |                   |
| Apparatus for Mixing or Disintegrating. (P) McNichol          |                                    | From Mayer. (xii, 1893) .....                                 | 785               |
| and Walsh. (iv, 1885) .....                                   | 97                                 | Occurrence of, in Natural Phosphates. (Carnot.) (xi,          |                   |
| Apparatus for Recording Rate of Distillation of. (P)          |                                    | 1892) .....                                                   | 759               |
| McDaniel. (xi, 1892) .....                                    | 931                                | Preparation and Density of. (Moissan.) (iv, 1890) .....       | 186               |
| Apparatus for Regulating Flow of. (P) Brin's Oxygen           |                                    | Removal of Vapours containing, in Manure Works. (x,           |                   |
| App. for Regulating Temp. of. (P) Royle. (xiii, 1894) ..      | 1179                               | Salts, Formation and Value of. (Netto.) (ix, 1890) .....      | 182               |
| Apparatus for Separating, from Solids:                        |                                    | Fluoriform. (Melsun.) (ix, 1890) .....                        | 646               |
| (P) Birch. (xii, 1893) .....                                  | 469                                | Fluoroline and Cincholine. (Hesse.) (xi, 1892) .....          | 639               |
| (P) O'Brien. (xiv, 1895) .....                                | 495                                | Fluorspar in the United States. (T.R.) .....                  | (vii, 1888), 601; |
| Apparatus for Sitting and Mixing Thick. (P) Schmidt.          |                                    | (viii, 1889), 591; (x, 1891) .....                            | 507               |
| (xiv, 1895) .....                                             | 641                                | Use of, in Metallurgy. (Fochr.) (ix, 1890) .....              | 516               |
| Apparatus for Sterilising. (P) Redfern. From Neubass          |                                    | Fluosilicates, Production of. (P) Yardley. (x, 1891) .....    | 611               |
| and others. (xi, 1892) .....                                  | 630                                | Flux for Coating Iron or Steel with Copper. (P) Chandler.     |                   |
| Apparatus for Testing. (P) Hauberg. (x, 1891) .....           | 719                                | (viii, 1889) .....                                            | 802               |
| Apparatus for Treating Pulverulent Matters by. (P) Wise.      |                                    | For Soldering Aluminium and other Metals. (P) Thomp-          |                   |
| From Solvay and Co. (ix, 1890) .....                          | 726                                | son. From Nicolai. (xiii, 1894) .....                         | 890               |
| Application of Heat from Inflammable, to various Materials.   |                                    | Metallic, for Refining Iron and Steel. (P) Senticella.        |                   |
| (P) Stone. (vi, 1887) .....                                   | 634                                | (xii, 1893) .....                                             | 273               |
| Burning Hydrocarbon, as Fuel in Furnaces. (P) Lyle.           |                                    | Skimmings from Galvanising Works, Utilising. (P) Kirk-        |                   |
| (vii, 1888) .....                                             | 381                                | mann. (viii, 1889) .....                                      | 713               |
| Centrif. App. for Separating. (P) Laidlaw. (xiv, 1895) ..     | 737                                | Skimmings, Treating Residues from. (P) Cook and Petter.       |                   |
| Containing Alcohol, Ageing. (P) Boul. From Besser.            |                                    | (xii, 1893) .....                                             | 695               |
| (xiv, 1895) .....                                             | 879                                | Treatment of Galvaniser's. (P) Kenyon. (ii, 1883) .....       | 416               |

| Smokeless Combustion of. (P) Lake. From Clarenbach. (xii, 1893).....                     | 1020     |
| Solidifying Petroleum for, for Transportation. (P) Allina. (xii, 1893).....              | 31       |
| Spraying Apparatus for Liquid. (P) Warren. (xiv, 1895).....                              | 473      |
| Steam and Oil Gas for, Manufacture of. (P) Boulton. From Brooks. (vi, 1887).....         | 503      |
| Treatment of. (P) Scott-Moncrieff. (xii, 1893).....                                      | 438      |
| Treatment of Peat for Production of. (P) Loé and Gumbart. (x, 1891).....                 | 627      |
| Use of Coal-Gas as a. (Siemens.) (First Proceedings).....                                | 39       |
| Use of Gas as a Heating Agent Compared with Other. (Davis.) (ii, 1883).....              | 68       |
| Use of Liquid. (P) Terry. (xiv, 1895).....                                               | 796      |
| Use of Liquid, in Copper Smelting. (Schmabel.) (x, 1891).....                            | 1008     |
| Use of Petroleum as. (T.R.) (xiv, 1895).....                                             | 639      |
| Utilisation of Waste Residues of. (P) (iv, 1885).....                                    | 201      |
| Utilising Oils or Gases as. (P) Welch. (vi, 1887).....                                   | 538      |
| Utilising Waste of Distilleries, &c., for Preparation of. (P) Parks. (x, 1891).....      | 844      |
| Value of Coal-Tar Pitch for Patent. (Muck.) (ix, 1890).....                              | 47       |
| Value of Gases as. (Payne.) (xii, 1893).....                                             | 1016     |
| Value of Straw as. (xii, 1893).....                                                      | 254      |
| Fuels, Apparatus for Gasification of. (P) Wise. From Solvay and Semet. (x, 1891).....    | 243      |
| Chemistry of Mineral. (Boussingault.) (ii, 1884).....                                    | 353      |
| Estimation of Caloric Value of. (Rowan.) (vii, 1888).....                                | 195, 308 |
| Estimation of Thermal Effects of. (Hempel.) (xii, 1893).....                             | 179      |
| Investigation of. (Lunge.) (i, 1882).....                                                | 13       |
| Nitrogen in, and Yield of Ammonia therefrom. (Tichauer.) (xiv, 1895).....                | 143      |
| Valuation of. (Fischer.) (vii, 1888, 690; (xiii, 1894).....                              | 420      |
| Fuller's Earth, Apparatus for Washing, &c. (P) Sheppard. (ix, 1890).....                 | 273      |
| Earth at Dunning. (T.R.) (xii, 1893).....                                                | 477      |
| Earth, Preparation of, for Manufactures:                                                 |          |
| (P) Candy. (vi, 1887).....                                                               | 660      |
| (P) James. (vii, 1888).....                                                              | 324      |
| Spiral Slide Rule for Chemical Calculations. (Watson.) (xi, 1892).....                   | 324      |
| Fumaric Acid, Alkaloids of. (Battandier.) (xiv, 1895).....                               | 883      |
| Fumaric Acid, Conversion of Maleic Acid into. (Skraup.) (x, 1891).....                   | 945      |
| Fume in Lead Works, Treatment of. (P) Warwick. (vi, 1887).....                           | 218      |
| Or Smoke, Collecting Solids from. (P) Thompson. From Dewey. (ix, 1890).....              | 48       |
| Fumes, Absorbing and Utilising Sulphuric and Sulphurous Acid. (P) Thorp. (ix, 1890)..... | 623      |
| App. for Purif. of Gaseous. (P) Purcell. (xi, 1892).....                                 | 1025     |
| Arrangements for Treating. (P) Salmon. (xii, 1893).....                                  | 437      |
| Condensers for Acid. (P) Doulton and Sanceau. (xiv, 1895).....                           | 658      |
| Condensing Metallic. (P) Elliott. (xi, 1892).....                                        | 822      |
| From Electric Batteries, Preventing Escape of. (P) Bailey and Warner. (vi, 1887).....    | 379, 379 |
| From Kilns, Deodorising. (P) Ashby. (ix, 1885).....                                      | 415      |
| In Lead Works, Treatment of. (P) Warwick. (xiv, 1895).....                               | 490      |
| Poisoning by Coal-Gas and Charcoal. (Poleck.) (iv, 1885).....                            | 608      |
| Fumigant for Horticultural Buildings. (P) Smithson. (xiii, 1894).....                    | 900      |
| Fumigants. (P) McDougall. (xiii, 1894).....                                              | 657      |
| Manufacture of. (P) McDougall. (xiii, 1894).....                                         | 833      |
| Fumigating and Disinfecting Compound, Combined. (P) Stoner and Turton. (iv, 1885).....   | 547      |
| Fumigation, Preserving Perishable Substances by. (P) Wheaton. (ix, 1890).....            | 98, 98   |
| Fungi, Importance of, Edible, as Human Food. (Saltet.) (v, 1886).....                    | 171      |
| Nutritious Value of Edible. (Moerner.) (vi, 1887).....                                   | 297      |
| Saccharine Bodies in. (Bourquelot.) (x, 1891).....                                       | 56       |
| Funnel, A Dropping. (Neumann.) (vii, 1888).....                                          | 643      |
| A Measuring. (P) Dahmo. (vii, 1888).....                                                 | 345      |
| An Improved. (P) Howcroft. (viii, 1889).....                                             | 648      |
| And Measure for Liquids. (P) Brown. (ix, 1890).....                                      | 43       |
| Condensing. (Meyer.) (iii, 1884).....                                                    | 650      |
| For Filtration in Absence of Air. (Allihn.) (iv, 1885).....                              | 368      |
| Laboratory Dropping. (Pollack.) (vi, 1887).....                                          | 606      |
| Or Tun-Dish, Indicating. (P) Fitter and Buxley. (xiv, 1895).....                         | 792      |
| Separating. (Currier.) (iii, 1884).....                                                  | 650      |
| Funnels:                                                                                 |          |
| (P) Blakely. (viii, 1889).....                                                           | 808      |
| (P) Gersdorff. (vi, 1887).....                                                           | 364      |
| (P) Hartle. (xii, 1893).....                                                             | 181      |
| Filtering. (Nickels).....(vi, 1887, 134, 327; (P) (vii, 1888), 596                       |          |

| Furfuraldehyde, Col. Matters from. (Schiff.) (v, 1886).....                                            | 377, 558 |
| Estimation of. (Gunther and Tollens.) (ix, 1890).....                                                  | 903      |
| Presence of, in Commercial Alcohols. (Lindet.) (ix, 1890).....                                         | 1155     |
| Reactions for Detecting Fusel Oil. (Neumann-Wender.) (x, 1891).....                                    | 487      |
| Furfural-yielding Bodies from Wheat and Rye-Chaff. (Steizer and Schulze.) (ix, 1890).....              | 1143     |
| Furfural. (Guyard.) (iii, 1884).....                                                                   | 514      |
| Colour Reactions of. (Laves.) (xi, 1892).....                                                          | 48       |
| Formation of, for Detection of Arabinose. (Guns and others.) (vii, 1888).....                          | 535      |
| Quant. Determin. of. (Wellbel and Zeissel.) (xiv, 1895).....                                           | 689      |
| Reactions of Alkaloids. (Wender.) (xii, 1893).....                                                     | 860      |
| Use of, for Detection of Sesame Oil. (Villavecchia and Fabris.) (xii, 1894).....                       | 69       |
| Furfural-hydrone, Gravimetric Estimation of. (Krug.) (xii, 1893).....                                  | 551      |
| Furfuryl Derivatives and Sugars, New Relations Between. (Maquenne.) (ix, 1890).....                    | 202      |
| Furnace, A Hydrocarbon, for Assaying. (Ellis.) (viii, 1889).....                                       | 956      |
| An Improved. (P) Dempster. (xiii, 1894).....                                                           | 871      |
| And Apparatus for Treating Town Refuse. (P) Henley and Thwaite. (iv, 1885).....                        | 545      |
| App. for Combustion of Fuel. (P) Marshall. (xi, 1892).....                                             | 733      |
| Assay. (Wood.) (x, 1891).....                                                                          | 701      |
| Black Ash, New. (Smith.) (vi, 1887).....                                                               | 416      |
| Basic Siemens-Martin. (Leo.) (x, 1891).....                                                            | 772      |
| Blast and Cupola, Extraction of Lead in. (Williger.) (i, 1882).....                                    | 154      |
| Charges, Slide-rule for Calculating. (Wingham.) (xi, 1892).....                                        | 821      |
| Coal in the Lead Blast. (Dwight.) (x, 1891).....                                                       | 933      |
| Coal Smelting and Carbonisation. (P) Hiltawski. (ii, 1883).....                                        | 295      |
| Combined Gas and Coke. (P) Schomburg. (xii, 1893).....                                                 | 589      |
| Combustion. (Volhard.) (xiv, 1895).....                                                                | 299      |
| Cowles' Aluminium. (Thompson.) (v, 1886).....                                                          | 206      |
| Crucible. (P) Mills. From Fischer. (iii, 1884).....                                                    | 321      |
| Destructeur, Experiments at Berlin. (xiv, 1895).....                                                   | 881      |
| Desulphurising and Oxidising Ore. (P) Browne. (i, 1882).....                                           | 311      |
| Double-puddling. (P) Sprinzer. (ii, 1883).....                                                         | 135      |
| Economic Position of Open-Hearth Steel. (Campbell.) (T.R.) (xii, 1894).....                            | 82       |
| Electric for Laboratory Use. (Readman.) (xiii, 1894).....                                              | 375      |
| Electric Melting and Reducing. (P) Urbanitzky. (xiv, 1895).....                                        | 661      |
| Fires. (P) Emay. From Mannesmann. (x, 1891).....                                                       | 448      |
| For Annealing Glass. (P) Tondeur. (i, 1882).....                                                       | 280      |
| For Annealing Plate Glass with Gas. (P) Gilles. (viii, 1889).....                                      | 393      |
| For Burning Earthware. (P) Dumachie. (i, 1882).....                                                    | 594      |
| For Burning Lime, &c. (P) Justice. From Dietzsch. (v, 1886).....                                       | 328      |
| For Burning Petroleum. (Crane.) (xiii, 1894).....                                                      | 21       |
| For Charcoal. (P) Güttler. (viii, 1889).....                                                           | 60       |
| For Chemical Operations:                                                                               |          |
| (P) Davis. (x, 1891).....                                                                              | 528      |
| (Weldon.) (iv, 1885).....                                                                              | 171      |
| For Cinnabar "Fines" at Almaden. (viii, 1889).....                                                     | 709      |
| For Continuously Reducing Iron Ore. (P) Siemens. (v, 1886).....                                        | 608      |
| For Decomposition of Bicarbonate of Soda. (P) Solvay. (vii, 1888).....                                 | 628      |
| For Deodorising and Consuming Excrement. (P) Kozloff. (xii, 1893).....                                 | 617      |
| For Evaporating and Calcining. (P) Siemens. (vi, 1887).....                                            | 649      |
| For Glass Melting:                                                                                     |          |
| (P) Frank. (ii, 1883).....                                                                             | 43       |
| (P) Leuffgen. (ii, 1883).....                                                                          | 178      |
| (P) Smith. (i, 1882).....                                                                              | 503      |
| For Lead Smelting. (Glenhall.) (i, 1882).....                                                          | 234      |
| For Manufacture of Sulphate of Soda, &c., or for Calcining Ores. (P) Black and Larkin. (iv, 1885)..... | 212      |
| For Obtaining Crude Copper direct from Ore. (P) Clark. From Garnier. (iv, 1885).....                   | 225      |
| For Preparation of Carbonic Acid. (Meyer-Mülser.) (iii, 1884).....                                     | 568      |
| For Preparing Crude Glass by Leuffgen's Method. (P) Quaglio. (ix, 1890).....                           | 393      |
| For Producing Chlorine. (P) Solvay. (vi, 1887).....                                                    | 661      |
| For Production of Gas from Oil. (P) Schwarz. (i, 1882).....                                            | 314      |
| For Prod. of Sulphates, &c. (P) Mackenzie. (ii, 1883).....                                             | 477      |
| For Production of Zinc. (P) Kleemann. (iv, 1885).....                                                  | 56       |
| For Recovering Salts from Lyes. (P) Dahl. (vi, 1887).....                                              | 442      |

## Furnace—cont.

|                                                                                                                                             | PAGE |
|---------------------------------------------------------------------------------------------------------------------------------------------|------|
| For Recovering Soda Ash. (P) Hitchen. (iv, 1885).....                                                                                       | 116  |
| For Reducing or Smelting Ores. (P) Smethers. (xii, 1893)                                                                                    | 48   |
| For Reducing Zinc, &c. (P) Nawrocki. From Quaglio, Pintsch, and Lentz. (iii, 1884).....                                                     | 639  |
| For Refining Metals and Alloys. (P) Alzugaray. (ix, 1890)                                                                                   | 950  |
| For Revivifying Bone Black. (P) Weber. (i, 1882).....                                                                                       | 463  |
| For Roasting Ores. (P) Lake. From Walker and Carter. (iii, 1884).....                                                                       | 320  |
| For Smelting or Fusing Metals. (P) Quaglio, Pintsch, and Lentz. (iv, 1885).....                                                             | 503  |
| For Tempering Malleable Cast Iron. (N) Sch. (i, 1882).....                                                                                  | 234  |
| For Treating Copper and its Alloys. (P) Keys. (ix, 1890)                                                                                    | 1041 |
| For Treating Ingots, &c. (P) Allen. (xiv, 1895).....                                                                                        | 278  |
| For Treating Sulphur Ores. (P) McDouall. (iii, 1884).....                                                                                   | 320  |
| For Treatment of Refractory Ores. (P) Fauvel. (xi, 1892).....                                                                               | 613  |
| For Working Ores. (P) Allison. From Storey and others. (xiii, 1894).....                                                                    | 816  |
| For Zinc Ores. (P) Neundahl. (iv, 1885).....                                                                                                | 55   |
| Fumes, Condensing Metallic. (P) Elliott. (xi, 1892).....                                                                                    | 822  |
| Fumes, Extraction of Sulphurous Acid from. (P) Brydges. From Hanisch and Schroder. (iii, 1884).....                                         | 107  |
| Gas, for Laboratory Purposes. (iii, 1884).....                                                                                              | 512  |
| Gas, with Continuous Action. (P) Langden. (i, 1882).....                                                                                    | 491  |
| Gases, Composition of. (J)ürsch. (xii, 1893).....                                                                                           | 813  |
| Gases, Obtaining Ammonia from. (P) Main and Galbraith. (iv, 1885).....                                                                      | 111  |
| Gases, Separation of Carbonic Oxide from. (P) Huntington. (iv, 1885).....                                                                   | 737  |
| Gases, Utilisation of Blast-. (Sch)radter and Macco: Lurmann, Belani, Alexander, Korting, Young and Beilby, and Ehrenwerth. (iv, 1885)..... | 217  |
| "Godillot," for Inferior Fuels. (Brüll). (ix, 1890).....                                                                                    | 44   |
| Grate in the Form of Steps. (P) Randah. (ii, 1883).....                                                                                     | 254  |
| Heated by Generator Gases. (P) Beck. (i, 1882).....                                                                                         | 503  |
| Lining, Basic. (P) Alzugaray. (xi, 1892).....                                                                                               | 922  |
| Linings, Manuf. of. (P) Fould and Genouan. (vi, 1887).....                                                                                  | 43   |
| Linings, Use of Limestone for. (P) (i, 1882).....                                                                                           | 370  |
| Mechanical Decomposing. (Larkin). (iv, 1885).....                                                                                           | 33   |
| Metallurgical and Chemical. (P) Wilkinson. (xiv, 1895)                                                                                      | 736  |
| Modified Combustion. (Fuchs). (xii, 1893).....                                                                                              | 181  |
| Oil Flame. (P) Lucien Light Company, Limited, and Jarman. (x, 1891).....                                                                    | 533  |
| "Ore Process" in the Basic Open-Hearth. (Leo). (xi, 1892).....                                                                              | 213  |
| Pan and Concentrator for Boiling Fish Livers. (P) Lotherington and Spencer. (xiii, 1894).....                                               | 162  |
| Recuperative Gas. (Bigot). (xiii, 1894).....                                                                                                | 174  |
| Refuse, and Apparatus for Manufacturing Gas, Combined. (P) Lomax. (xii, 1893).....                                                          | 31   |
| Regenerative Coke. (P) Hoffmann. (i, 1882).....                                                                                             | 492  |
| Regenerative, for Lead Smelting. (P) Miskey. (iv, 1885)                                                                                     | 54   |
| Regenerative, for Manufacture of Gas. (P) Walsh. From Ryex. (ii, 1884).....                                                                 | 565  |
| Regenerative Gas, for Reduction of Zinc Ores. (P) Dor. (xi, 1892).....                                                                      | 615  |
| Results from Springer's Double Puddling. (iii, 1884).....                                                                                   | 174  |
| Reverberatory. (P) Fenwick and Cochrane. (i, 1882).....                                                                                     | 177  |
| St. Bede Patent Decomposing. (Rennoldson). (iv, 1885)                                                                                       | 316  |
| Scaffolding in the Blast-. (Van Ustien). (xii, 1893).....                                                                                   | 927  |
| Siemens, Construction of the. (Addie). (x, 1891).....                                                                                       | 934  |
| Siemens, Study of the New. (Dancour). (xii, 1893)                                                                                           | 662  |
| Siemens, to Recover Waste Gases and Heat. (Head and Pouff). (viii, 1889).....                                                               | 764  |
| Smelting. (P) Bramhall. (iv, 1885).....                                                                                                     | 223  |
| Smelting, Construction of:                                                                                                                  |      |
| (P) Bliss. (i, 1882).....                                                                                                                   | 192  |
| (P) Ferrie. (i, 1882).....                                                                                                                  | 457  |
| Smoke-Consuming Arrangements. (P) Michalk. (xiv, 1895).....                                                                                 | 956  |
| Smoke-Consuming, Construction of. (P) Heiser. (ii, 1883)                                                                                    | 406  |
| Use of Hempel's, to Demonstrate Manufacturing Processes. (Lüpke). (xii, 1893).....                                                          | 865  |
| Water-Oil Gas in the Steel-. (viii, 1889).....                                                                                              | 51   |
| With Self-acting Stoker. (P) Unger. (xiv, 1895).....                                                                                        | 857  |
| Working of Blast-. (Jüptner). (iv, 1885).....                                                                                               | 677  |

## Furnaces:

## Furnaces—cont.

|                                                                                                                   | PAGE |
|-------------------------------------------------------------------------------------------------------------------|------|
| Apparatus for Utilising Waste Heat from. (P) Kingsford. (iv, 1885).....                                           | 582  |
| Apparatus for Withdrawing Metals, &c. from. (P) Rylands and Homer. (x, 1891).....                                 | 36   |
| Appliances for Recording Temperature of. (Roberts-Austen). (xi, 1892).....                                        | 840  |
| Application of Water-Gas to. (P) Fox. (x, 1891).....                                                              | 552  |
| Arrangement for Charging Connected. (P) Sachs. (i, 1882).....                                                     | 440  |
| Arsenical Bottoms in Basic-lined Treatment of, in Copper Smelting. (Gilchrist). (x, 1891).....                    | 4    |
| Bagasse-. (P) Fairweather. From The Babcock and Wilcox Co. (viii, 1889).....                                      | 910  |
| Basic-Lined. (P) Darby. (xi, 1892).....                                                                           | 614  |
| Basic Linings for Steel and Iron. (P) Batho. (iv, 1885).....                                                      | 224  |
| Blast-:                                                                                                           |      |
| (P) Evans. (viii, 1889).....                                                                                      | 287  |
| (P) Hawdon and Howson. (xii, 1893).....                                                                           | 161  |
| Blast and Cupola. (P) Swain. (iv, 1885).....                                                                      | 121  |
| Blast-, Construction of. (P) Rushforth. (xii, 1893).....                                                          | 360  |
| Blast-, Processes for Recovery of Tar and Ammonia from. (Jones). (iv, 1885).....                                  | 737  |
| Blast, Production of Antimony in. (Balling). (v, 1886).....                                                       | 328  |
| Boiler and other. (P) Newton. (xiv, 1895).....                                                                    | 643  |
| Bricks for, Production of. (P) Bird. (xi, 1892).....                                                              | 694  |
| Burning Hydrocarbon Fluids as Fuel in. (P) Lyle. (vii, 1888).....                                                 | 381  |
| Burning Liquid Fuel in Boiler. (P) Haddan. From Amoroso. (ix, 1890).....                                          | 596  |
| Calcining. (P) Dauber. (xii, 1893).....                                                                           | 811  |
| Capacity and Form of Blast-. (Hawdon). (xiii, 1894).....                                                          | 643  |
| Charging Materials into Blast-. (P) Wise. From Solvay. (x, 1891).....                                             | 749  |
| Cinder Car for Blast-. (P) Kennedy. (i, 1882).....                                                                | 508  |
| Coke-. (P) Collin. (xii, 1893).....                                                                               | 438  |
| Coke-, for Utilising Distillation Products. (P) Hussener. (i, 1882).....                                          | 180  |
| Coke, Modifications in. (P) Müller. (ii, 1883).....                                                               | 236  |
| Combustion in, Promotion of. (P) Norman and Simpson. (x, 1891).....                                               | 245  |
| Combustion of Fuel in. (P) Chandler and Rallings. (xiv, 1895).....                                                | 642  |
| Combustion of Gaseous Fuel in. (P) Gaseous and Liquid Fuel Supply Co. and Thwaite. (viii, 1889).....              | 605  |
| Combustion of Gases in. (P) Hargreaves. (xi, 1892).....                                                           | 806  |
| Condensing Balloons for Zinc. (P) Mielchen. (i, 1882).....                                                        | 458  |
| Construction of:                                                                                                  |      |
| (P) Cohen and Hermann. (x, 1891).....                                                                             | 245  |
| (P) Mergum. (xiv, 1895).....                                                                                      | 855  |
| (P) Sargent. (xi, 1892).....                                                                                      | 994  |
| (P) Stein. (xii, 1893).....                                                                                       | 585  |
| (P) Williams. (xi, 1892).....                                                                                     | 895  |
| Continuous Working Recuperative Gas-. (P) Dauber. (xiv, 1895).....                                                | 856  |
| Converter. (P) Boulton. From Bookwalter. (ix, 1890).....                                                          | 950  |
| Crucible:                                                                                                         |      |
| (P) Meichsen. (xi, 1892).....                                                                                     | 616  |
| (P) Piast. (viii, 1889).....                                                                                      | 400  |
| Cupola and Blast-. (P) Ross. (x, 1891).....                                                                       | 260  |
| Cupola, Construction of. (P) Kerr. (xi, 1892).....                                                                | 615  |
| Cupola, Modified Form of. (P) Bessan. (i, 1882).....                                                              | 410  |
| Cuvette, Producing Plate Glass in. (P) Schluder and Verstandig. (xiv, 1895).....                                  | 866  |
| Destructor. (P) Abell and Essequibo. (xiv, 1895).....                                                             | 1058 |
| Double Shaft. (P) Ehrenwerth. (viii, 1889).....                                                                   | 873  |
| Electric:                                                                                                         |      |
| (P) Chaplet. (xiii, 1894).....                                                                                    | 936  |
| (P) Crompton. (viii, 1889).....                                                                                   | 901  |
| (P) Justice. From Acheson. (xiv, 1895).....                                                                       | 585  |
| (P) Kreinsen. (xii, 1893).....                                                                                    | 934  |
| (P) Lake. From Girard and Street. (xiii, 1894).....                                                               | 625  |
| (P) Parker. (ix, 1890).....                                                                                       | 869  |
| Electric Heating of. (P) Poschinger. (xii, 1893).....                                                             | 698  |
| Employed in Alkali Manufacture, Mechanical. (Maclear). (First Proceedings).....                                   | 26   |
| Employment of Different Kinds of Fuel in Blast-. (Fehlmann, Bell, Kupelwieser, and Schmidhammer). (iv, 1885)..... | 216  |
| Eyepate for Glass. (P) Kane. (i, 1882).....                                                                       | 455  |
| Fire Gases from Boiler, Treating. (P) Patterson. (xiv, 1895).....                                                 | 791  |
| Fireproof Cement for. (P) Taylor. (xii, 1893).....                                                                | 355  |
| Flame and Boiler, Modifications in. (P) Wiltmann. (ii, 1883).....                                                 | 161  |
| For Aiding Combustion. (P) Beveridge. (viii, 1889).....                                                           | 39   |
| For Annealing Glass. (P) Bonta. (xi, 1892).....                                                                   | 818  |
| For Burning Bone-Black. (P) Weber. (ix, 1890).....                                                                | 168  |
| For Burning Bricks:                                                                                               |      |
| (P) Möller. (x, 1891).....                                                                                        | 259  |
| (P) Trevisan. (x, 1891).....                                                                                      | 259  |
| For Burning Cement, &c. (P) Justice. From Dietzsch. (v, 1886).....                                                | 100  |
| For Burning Hydrocarbons:                                                                                         |      |
| (P) Findlay. (ii, 1883).....                                                                                      | 264  |
| (P) Mundell and Gordon. (ii, 1883).....                                                                           | 263  |
| (P) Thompson. From Wright and Williams. (vii, 1888).....                                                          | 30   |
| For Burning Liquid Fuel:                                                                                          |      |
| (P) Sahlström and Hill. (x, 1891).....                                                                            | 353  |
| (P) Sahlström, Bromfield, and Hill. (ix, 1890).....                                                               | 1118 |

|----------------------------------------------------------------------------------------------------------------------------|----------|
| For Burning Pyrites. (P) Mason. (ii, 1883) .....                                                                           | 177      |
| For Burning Refuse. (P) Elliott and Paton. (xiii, 1894) ..                                                                 | 898      |
| For Burning Sludge, &c. (P) Benran and Deas. (xiv, 1895) .....                                                             | 644      |
| For Burning Small or Moist Fuel. (P) Abel. From Godillot. (iv, 1885) .....                                                 | 111      |
| For Burning Sulphur. (P) Fish. (x, 1891) .....                                                                             | 768      |
| For Burning Sulphur Ores. (P) McDougall. (xii, 1893) ..                                                                    | 155      |
| For Burning Tan and Refuse. (P) Brown. (x, 1891) .....                                                                     | 239      |
| For Calcining Copper Ore, Regulus, &c. (P) Dahne. (ix, 1890) .....                                                         | 396      |
| For Calcining Limestone, &c. (P) Doughton. (xiv, 1895) ..                                                                  | 956      |
| For Chemical Processes. (P) Macfar. (iv, 1885) .....                                                                       | 533      |
| For Chlorinating Ores. (P) Baugh and Hinksman. (vi, 1887) .....                                                            | 399      |
| For Coal Dust, &c. (P) Pelzer. (xiv, 1895) .....                                                                           | 740      |
| For Coking or Distilling Coal. (P) Semet and Solvay. (i, 1882) .....                                                       | 398      |
| For Concentrating Sulphuric Acid. (P) Negrier. (x, 1891) .....                                                             | 43       |
| For Concentrating Sulphuric Acid and other Liquids. (P) Bradbury. (xiii, 1894) .....                                       | 251      |
| For Consuming Refuse. (P) Baker. (xiv, 1895) .....                                                                         | 644      |
| For Controlling Combustion of Solid Fuel. (P) Nobel. (xiii, 1894) .....                                                    | 874      |
| For Decomposing Metallic Oxycchlorides. (P) Heinzerling. (vii, 1888) .....                                                 | 628      |
| For Destroying Town Refuse. (P) Horsfall. (xii, 1893) ..                                                                   | 172      |
| For Distilling Mineral Oils. (P) Morton and Fyfe. (v, 1886) .....                                                          | 594      |
| For Distilling Zinc, Cadmium, &c. (P) Golby. From Francischi. (xiii, 1894) .....                                           | 402      |
| For Drying Peat Briquettes. (P) Stauber. (xiii, 1894) ..                                                                   | 715      |
| For Electric Smelting. (P) Newerth. (xiii, 1894) .....                                                                     | 160      |
| For Extracting Sulphur. (P) Black and Larkin. (i, 1882) ..                                                                 | 232      |
| For Firing Pottery. (P) Plant. (xi, 1892) .....                                                                            | 494      |
| For Generation of Heat or Gas. (P) Blum. (xii, 1893) ..                                                                    | 534      |
| For Heating Iron. (P) Felton. (ii, 1883) .....                                                                             | 382      |
| For Heating or Melting Metals. (P) Butler. (xii, 1893) ..                                                                  | 450      |
| For Heating Pots and Crucibles. (P) Foster. (viii, 1889) ..                                                                | 884      |
| For Heating Solids out of Contact with Fuel. (P) Weldon. From Pechiney. (v, 1886) .....                                    | 471      |
| For Heating Steam Generators. (P) Knoen. (xiv, 1895) ..                                                                    | 643      |
| For Making Coke or Charcoal. (P) Armour. (xi, 1892) ..                                                                     | 172, 896 |
| For Making Malleable Iron and Steel. (P) Bureh and Allen. (iv, 1885) .....                                                 | 223      |
| For Manufacture of Gas. (P) Thompson. From Stettiner Chantotte Fabrik Actien Gesellschaft vormals Didier. (iv, 1885) ..... | 110      |
| For Manufacture of Glass. (P) King and Little. (i, 1882) .....                                                             | 110      |
| For Manufacture of Phosphorus, Electrical. (P) Parker. (xi, 1892) .....                                                    | 827      |
| For Manufacture of Steel. (P) Simonds. (xii, 1893) .....                                                                   | 843      |
| For Melting. (P) Mallaband. (xii, 1893) .....                                                                              | 360      |
| For Melting Glass, Puddling Iron, &c. (P) Bateson. (xiv, 1895) .....                                                       | 1036     |
| For Melting Metals. (P) Fletcher. (xii, 1893) .....                                                                        | 451      |
| For Production of Glass. (P) Rylands. (xi, 1892) .....                                                                     | 1007     |
| For Puddling and Heating. (P) Haigh. (x, 1891) .....                                                                       | 1011     |
| For Quicksilver. (ix, 1890) .....                                                                                          | 77       |
| For Recovering Tin from Tin Slag. (P) Letcher. (ix, 1890) .....                                                            | 950      |
| For Refining Camphor. (P) Lake. From McKenzie and Braker. (ix, 1890) .....                                                 | 762      |
| For Slack and Refuse. (P) Miles. (ix, 1890) .....                                                                          | 728      |
| For Smelting and Refining Copper. (P) Vienna. (xiii, 1894) .....                                                           | 644      |
| For Smelting and Refining Metals. (P) Bennett. (vi, 1887) .....                                                            | 371      |
| For Smelting Copper. (P) Bibby. (xi, 1892) .....                                                                           | 922      |
| For Smelting Copper Ores. (P) Richards. (x, 1891) .....                                                                    | 1010     |
| For Smelting Ores. (P) Inray. (ii, 1883) .....                                                                             | 285      |
| For Smelting Ores by Electricity. (P) Cowles. (v, 1886) .....                                                              | 331      |
| For Smokeless Combustion of Fuel. (P) Armstrong. (xiii, 1894) .....                                                        | 1051     |
| For Steam Generators. (P) Davies. (vii, 1889) .....                                                                        | 873      |
| For Steel-making. (P) Filassier and Fanre. (xi, 1892) ..                                                                   | 635      |
| For Town Refuse. (P) Willoughby. (xiv, 1895) .....                                                                         | 767, 767 |
| For Treating Animal and Vegetable Matters. (P) Ogden. (vi, 1887) .....                                                     | 672      |
| For Treating Bodies at High Temperatures. (P) Pechiney. (vii, 1888) .....                                                  | 837      |
| For Treating Glass. (P) Thompson. (i, 1882) .....                                                                          | 410      |
| For Treating Ores. (P) Parnell. (xi, 1892) .....                                                                           | 822      |
| For Treating Ores and Metals. (P) Swain. (ii, 1883) .....                                                                  | 383      |
| For Treatment of Carbonaceous Substances. (P) Stier. (iv, 1885) .....                                                      | 199      |
| For Utilising Hydrocarbon as Fuel. (P) Dymond. From The Aberted Fuel Company. (ix, 1890) .....                             | 49       |
| From Magnesians Bricks, Construction of. (P) Clansen. (x, 1891) .....                                                      | 395      |
| Gas and Air Reversing Valves for. (P) Jardine and Ferguson. (viii, 1889) .....                                             | 767      |
| Gas. Construction of. (P) Newton. From Oakman. (xi, 1892) .....                                                            | 1013     |
| Gas, for Glass Works. (P) Regnauld. (x, 1891) .....                                                                        | 354      |
| Gas Generating. (P) Mond. (iii, 1884) .....                                                                                | 232      |
| Gas Puddling. (P) Newton. From Oakman. (xi, 1892) ..                                                                       | 1013     |
| Gas-retort. (P) Hugener. (i, 1882) .....                                                                                   | 144      |
| Gases and Smoke from, Treating. (P) Davy. (xi, 1892) ..                                                                    | 21       |

| Apparatus, Difficulties of Working Parallel Series of. (Leybold.) (xiii, 1894) .....        | 1040     |
| Apparatus Employed in Manufacture of:                                                       |          |
| (P) Fourness. (xii, 1893) .....                                                             | 255      |
| (P) Winstanley. (xii, 1893) .....                                                           | 822      |
| Apparatus for Ascertaining Volume of a, in a Mixture. (P) Arndt. (xii, 1893) .....          | 1058     |
| Apparatus for Burning Coal, with Hydrocarbons. (P) Wallis and Ratcliffe. (v, 1886) .....    | 373      |
| Apparatus for Carbonising Coal for Manufacture of. (P) Wilton. (xiv, 1895) .....            | 471      |
| Apparatus for Carburation of, in Lamps. (P) Jensen. From Dery. (iv, 1885) .....             | 669      |
| Apparatus for Carburetted:                                                                  |          |
| (P) Gas Economising Syndicate and Love. (xi, 1892) .....                                    | 898      |
| (P) Hall. (ix, 1890) .....                                                                  | 170      |
| (P) Lennard. (xi, 1892) .....                                                               | 234      |
| (P) Little. (v, 1886) .....                                                                 | 24       |
| (P) Maxim. (viii, 1889) .....                                                               | 767      |
| (P) Maxim and Sedgwick. (x, 1891) .....                                                     | 244      |
| (P) Ormerod. (xiv, 1895) .....                                                              | 793      |
| (P) Vale. (i, 1882) .....                                                                   | 441      |
| (P) Wells. From Verne. (xii, 1893) .....                                                    | 136      |
| Apparatus for Carburetted Air for Use as. (P) Ford and Daddon. (v, 1886) .....              | 522      |
| Apparatus for Carburetted Water. (P) Glasgow. (xiv, 1895) .....                             | 261      |
| Apparatus for Carburising Compressed. (P) Riedinger. (ii, 1883) .....                       | 127      |
| Apparatus for Charging Beers with. (P) Puvrez. (xiv, 1895) .....                            | 378      |
| Apparatus for Condensing and Washing. (P) Kirkham and others. (xiv, 1895) .....             | 856      |
| Apparatus for Controlling Generation of, from Oil. (P) Brotherhood. (viii, 1889) .....      | 873      |
| Apparatus for Converting Coal-Tar into. (P) Smith. (xiii, 1894) .....                       | 626      |
| Apparatus for Converting Hydrocarbons into, &c. (P) Murray. From Archer. (v, 1886) .....    | 448      |
| Apparatus for Detecting Sulphuretted Hydrogen in. (Ledig.) (ix, 1890) .....                 | 108      |
| Apparatus for Distill. Oils into. (Macadam.) (vi, 1887) .....                               | 199      |
| Apparatus for Enriching:                                                                    |          |
| (P) Dicker. (iv, 1885) .....                                                                | 107      |
| (P) Kemp. (xiv, 1895) .....                                                                 | 796      |
| (P) Livesey and Whitehouse. (vi, 1887) .....                                                | 502      |
| (P) Love and Weston. (xiii, 1894) .....                                                     | 141      |
| (P) Parkes. (v, 1886) .....                                                                 | 236, 373 |
| (P) Siebel. (vi, 1887) .....                                                                | 503      |
| Apparatus for Estimation of Hydrogen in Marsh. (Hoppe-Seyler.) (vi, 1887) .....             | 563      |
| Apparatus for Extracting Impurities from Coal. (P) Hanson. (iv, 1885) .....                 | 49       |
| Apparatus for Extracting Tar and Ammonia from. (P) Lister. (xi, 1892) .....                 | 511      |
| Apparatus for Filtering. (P) Capitaine. From Moeller. (iv, 1885) .....                      | 197      |
| Apparatus for Generating:                                                                   |          |
| (P) Dixon. (x, 1891) .....                                                                  | 242      |
| (P) Girardet. (x, 1891) .....                                                               | 37       |
| (P) Hutchinson. (v, 1886), 95; (viii, 1889) .....                                           | 112      |
| (P) Langberg. (viii, 1889) .....                                                            | 872      |
| (P) Thomas. (x, 1891) .....                                                                 | 245      |
| (P) Thwaite. (xiv, 1895) .....                                                              | 856      |
| Apparatus for Generating and Burning, from Heavy Oils. (P) Robinson. (ix, 1890) .....       | 1025     |
| Apparatus for Generating and Consuming. (P) Love. (ix, 1890) .....                          | 596      |
| Apparatus for Generating, from Hydrocarbons. (P) Boulton. (iv, 1885) .....                  | 269      |
| Apparatus for Generating, from Liquids. (P) Dheyn and others. (x, 1891) .....               | 895      |
| App. for Generating Mineral Oil. (P) Linder. (x, 1891) .....                                | 627      |
| Apparatus for Increasing Illuminating Power of:                                             |          |
| (P) Rndd. (xi, 1892) .....                                                                  | 807      |
| (P) Wallis. (v, 1886) .....                                                                 | 522      |
| Apparatus for Indicating the Presence of. (P) Bella and Challoner. (iv, 1885) .....         | 746      |
| Apparatus for Illuminating by Oxhydrogen. (P) Wolters and Roslin. (i, 1882) .....           | 409      |
| Apparatus for Lighting. (P) Lorrain. (iv, 1885) .....                                       | 692      |
| Apparatus for Making:                                                                       |          |
| (P) Bourgois and Decoree. (xi, 1892) .....                                                  | 596      |
| (P) Brook and Wilson. (viii, 1889) .....                                                    | 533      |
| (P) Dinsmore. (xiv, 1895) .....                                                             | 138      |
| (P) Noteman. (xi, 1892) .....                                                               | 890      |
| Apparatus for Making Water. (P) Linn. From Flannery. (viii, 1889) .....                     | 451      |
| Apparatus for Manufacturing Carburetted Air. (P) Armstrong. From Jannet. (viii, 1889) ..... | 696      |
| Apparatus for Manufacturing, from Fluid Hydrocarbons. (P) Meeze. (vi, 1887) .....           | 719      |

## Apparatus for Manufacture of:

|                                             |                                   |
|---------------------------------------------|-----------------------------------|
| (P) Clark.....                              | (v, 1886), 634; (viii, 1889), 768 |
| (P) Clark, From Henning.....                | (iv, 1885)..... 111               |
| (P) de Lamarre.....                         | (xi, 1892)..... 735               |
| (P) Dinsmore.....                           | (xi, 1892), 735; (xiv, 1895), 855 |
| (P) Dowson.....                             | (iii, 1884)..... 233              |
| (P) Dvorkovitz.....                         | (xiii, 1894)..... 626             |
| (P) Gas Patents Syndicate, From Archer..... | (viii, 1889)..... 872             |
| (P) Gray.....                               | (xii, 1893)..... 588              |
| (P) Hartley.....                            | (xiii, 1894)..... 1050            |
| (P) Holgate.....                            | (x, 1891)..... 531                |
| (P) Howell and Smith.....                   | (ix, 1890)..... 850               |
| (P) Johnson.....                            | (iv, 1885)..... 190               |
| (P) Jones.....                              | (x, 1891)..... 38                 |
| (P) Jones, Leek, and Alexander.....         | (ix, 1890)..... 169               |
| (P) Kelman.....                             | (x, 1891)..... 245                |
| (P) Kitson.....                             | (xi, 1892)..... 149               |
| (P) Lake, From Humphreys.....               | (xii, 1893)..... 917              |
| (P) Love.....                               | (x, 1891)..... 688                |
| (P) McDougall.....                          | (viii, 1889)..... 272             |
| (P) Mayer.....                              | (xiv, 1895)..... 704              |
| (P) Midgley and Nunwick.....                | (iv, 1885)..... 268               |
| (P) Newton, From Oakman.....                | (xii, 1893)..... 746              |
| (P) Pitt, From Jerzmanowski.....            | (x, 1891)..... 533                |
| (P) Pollack.....                            | (iv, 1885)..... 106               |
| (P) Price.....                              | (x, 1891)..... 533                |
| (P) Scoth.....                              | (iv, 1885)..... 106               |
| (P) Schweb, From Overhoff.....              | (iii, 1884)..... 408              |
| (P) Thompson, From Smith and Alcock.....    | (i, 1882)..... 141                |
| (P) Van Syckel.....                         | (xii, 1893)..... 917              |
| (P) Walker.....                             | (x, 1891)..... 627                |
| (P) Williams.....                           | (xi, 1892)..... 735               |

## Apparatus for Manufacture of, and By-Products from Liquid Hydrocarbons. (P) Dvorkovitz. (xii, 1893)..... 1018

## Apparatus for Manufacture of Carburetted Water. (P) Merrifield and others. (xii, 1893)..... 589

## Apparatus for Manufacture of, from Liquids. (P) Howell. (v, 1886)..... 522

## Apparatus for Manufacture of, from Oils. (P) Boulton, From Hanlon. (iv, 1883)..... 530

## Apparatus for Manufacture of, from Petroleum Oil. (P) Thompson, From Sanford. (x, 1891)..... 534

## Apparatus for Manufacture of Heating:

|                 |                    |
|-----------------|--------------------|
| (P) Kitson..... | (ix, 1890)..... 48 |
| (P) Loomis..... | (ix, 1890)..... 49 |

## Apparatus for Manufacture of Oil:

|                                                        |                      |
|--------------------------------------------------------|----------------------|
| (P) Alexander and Paterson.....                        | (v, 1886)..... 160   |
| (P) Dvorkovitz.....                                    | (xii, 1893)..... 438 |
| (P) Herring.....                                       | (xiv, 1895)..... 137 |
| (P) Mansfield.....                                     | (v, 1886)..... 522   |
| (P) Mayer.....                                         | (xiv, 1895)..... 856 |
| (P) Moeller.....                                       | (xii, 1893)..... 255 |
| (P) Northern Counties Hydro Oxygen Co., and Goble..... | (xii, 1893)..... 588 |

## Apparatus for Manufacture of Water:

|                        |                                          |
|------------------------|------------------------------------------|
| (P) Briggs.....        | (ix, 1890)..... 274                      |
| (P) Fox and Blass..... | (x, 1891)..... 687                       |
| (P) Glasgow.....       | (xii, 1893), 746, 821; (xiii, 1894), 935 |
| (P) Paisley.....       | (x, 1891), 242; (xii, 1894), 242         |
| (P) Westcott.....      | (xiii, 1894)..... 1051                   |

## Apparatus for Measuring Pressure of, in Guns. (P) Castenholz. (xiii, 1894)..... 929

## Apparatus for Mixing Air with. (P) Vickers and Everett. (xi, 1892)..... 424

## Apparatus for Producing:

|                             |                    |
|-----------------------------|--------------------|
| (P) Muller and Adkins.....  | (x, 1891)..... 245 |
| (P) Pitt, From Berland..... | (i, 1882)..... 97  |

## Apparatus for Producing Combustible, for Motors. (P) Griffin. (x, 1891)..... 453

## Apparatus for Producing, continuously. (P) Elliott. (viii, 1889)..... 696

## Apparatus for Producing, from Air. (P) Fritz. (ix, 1890)..... 925

## Apparatus for Producing, from Hydrocarbons. (P) Marsh. (vi, 1887)..... 500

## Apparatus for Producing Water:

|                                              |                     |
|----------------------------------------------|---------------------|

| (P) Bromilow. (xi, 1892).....                                                                                 | 806  |
| (P) Brook. (viii, 1889).....                                                                                  | 381  |
| (P) Dauber. (x, 1891).....                                                                                    | 333  |
| (P) Dawson. (xiv, 1895).....                                                                                  | 956  |
| (P) Duff. (xiii, 1894).....                                                                                   | 140  |
| (P) Imray. From Mannesmann. (x, 1891).....                                                                    | 452  |
| (P) Radcliffe. (vi, 1887).....                                                                                | 134  |
| (P) Sutherland..... (vi, 1887), 501; (xii, 1893), 915                                                         |      |
| (P) Wilson..... (v, 1886), 317; (viii, 1889), 351                                                             |      |
| And Fuel-supplying Devices therefor. (P) Wilson. (vii, 1888).....                                             | 332  |
| Appliance for Breaking Down Crust in. (P) Hall. (xiii, 1894).....                                             | 627  |
| Construction of:                                                                                              |      |
| (P) Abel. From Siemens. (iv, 1885).....                                                                       | 393  |
| (P) Howson. (iv, 1885).....                                                                                   | 450  |
| (P) Meldrum. (xiii, 1894).....                                                                                | 242  |
| Examination of Tar from Sutherland's. (Smith.) (iii, 1884).....                                               | 9    |
| Feed Device for. (P) Bildt. (xii, 1893).....                                                                  | 747  |
| Fuel Feeding to. (P) Hargreaves. (xi, 1892).....                                                              | 995  |
| Of Siemens' Type. (P) McFarlane. (iv, 1885).....                                                              | 201  |
| Or Furnaces. (P) Pinkney. (xiv, 1895).....                                                                    | 142  |
| Separation of Carbonic Oxide from Products of. (P) Huntington. (iv, 1885).....                                | 737  |
| Treatment of Tars and Oils from. (P) Bell. (iv, 1885).....                                                    | 531  |
| Working of. (P) Fichet and Henrity. (xii, 1893).....                                                          | 821  |
| Gas-volumes, Apparatus for Rapid Reduction of, to Normal Pressure and Temperature. (Winkler.) (iv, 1885)..... | 757  |
| Apparatus to Reduce, to Normal Pressure. (Lunge.) (vii, 1888).....                                            | 521  |
| Extension of Lunge's Tables for. (Lwoff.) (xii, 1893).....                                                    | 1060 |
| Gas-volumeter, Convenient Form of. (Lunge.) (x, 1891).....                                                    | 1031 |
| Construction of. (Lunge)..... (ix, 1890), 547; (xi, 1892), 1033                                               |      |
| Gas Wash-Bottle, Double-Action. (Allihn.) (iv, 1885).....                                                     | 65   |
| Gas-washer. (P) Pettigrew. (xiv, 1895).....                                                                   | 796  |
| Gas-washers. (P) Saville. (ix, 1890).....                                                                     | 925  |
| For Extraction of Tar, &c., from Coal-gas. (P) Cripps. (xiii, 1894).....                                      | 379  |
| Gas-water, Apparatus for Obtaining Ammonia from. (P) Wunder. (i, 1882).....                                   | 180  |
| Gases, Absorbing Hydrochloric Acid from Furnaces. (P) Precht. (i, 1882).....                                  | 454  |
| Absorption of, and Apparatus therefor. (P) Mackay. (vi, 1887).....                                            | 368  |
| Absorption of Atmospheric, by Water. (Petterson and Sönden.) (viii, 1889).....                                | 726  |
| Absorption of, by Petroleum. (Griewosz and Walfisz.) (viii, 1889).....                                        | 772  |
| Action of, on Cement. (Toméi.) (ix, 1890).....                                                                | 73   |
| Action of, on Copper and the Noble Metals. (Neumann.) (xii, 1893).....                                        | 294  |
| Alkaline and other Compounds from Blast-Furnace, Extracting. (P) Imray. From Greth. (xiii, 1894).....         | 816  |
| Altering Proportions of Mixed. (P) Fox and Blass. (ix, 1890).....                                             | 595  |
| Ammonia, Extracting, from Furnace:                                                                            |      |
| (P) Lake. From Soc. Anon. Lorraine Indus. de Hussigny. (iv, 1885).....                                        | 332  |
| (P) Neilson. (i, 1882).....                                                                                   | 365  |
| Analyses of, by Dr. Wallace. (Hunt.) (iii, 1884).....                                                         | 96   |
| Analysis of. (Winkler.) (viii, 1889).....                                                                     | 570  |
| Analysis of Deacon. (Younger.) (ix, 1890).....                                                                | 159  |
| Analysis of Illuminating. (Lewes.) (x, 1891).....                                                             | 407  |
| Analysis of Mineral Oil. (Macurthur.) (vi, 1887).....                                                         | 810  |
| And Air, Apparatus for Producing Currents of. (P) Bletcher. (xii, 1893).....                                  | 667  |
| And Liquids, Apparatus for Mixing. (P) Priestman. (xiv, 1895).....                                            | 470  |
| And Liquids, Apparatus for Treating. (P) Theisen. (xii, 1893).....                                            | 742  |
| And Products, Blast Furnace. (Bayer.) (xiv, 1895).....                                                        | 530  |

## Gases—cont.

|                                                                                                 | PAGE     |
|-------------------------------------------------------------------------------------------------|----------|
| And Vapours, Apparatus for Cooling. (P) Weldon. From Pechiney. (v, 1886).....                   | 325      |
| And Vapours, Pumps for. (P) Bannister. (viii, 1889).....                                        | 111      |
| And Vapours, Relative Densities of. (Rowan.) (viii, 1889).....                                  | 183      |
| Apparatus for Absorption of:                                                                    |          |
| (P) Carlisle and Hoffman. (viii, 1889).....                                                     | 449      |
| (P) Edwards. From Lunge and Rohrmann..... (v, 1886), 468; (vi, 1887), 597                       |          |
| Apparatus for Absorption of, by Liquids:                                                        |          |
| (P) Edwards. From Rohrmann and Hiller. (v, 1886).....                                           | 423      |
| (P) Müller. (xiv, 1895).....                                                                    | 15       |
| Apparatus for Adding Volatile Substances to. (P) Fox and Blass. (viii, 1889).....               | 873      |
| Apparatus for Analysing:                                                                        |          |
| (Pfeiffer.) (xiii, 1894).....                                                                   | 63       |
| (P) Uehling and Steinbart. (xiv, 1895).....                                                     | 66       |
| Apparatus for Ascertaining Weight of. (P) Arndt. (xii, 1893).....                               | 1058     |
| Apparatus for Charging Liquids with:                                                            |          |
| (P) Leviustein. (v, 1886).....                                                                  | 36       |
| (P) Minto. (xi, 1892).....                                                                      | 596      |
| Apparatus for Charging, with Vapours. (P) Reichling. (viii, 1889).....                          | 869      |
| Apparatus for Compressing and Expanding. (P) Windhausen. (viii, 1889).....                      | 269      |
| Apparatus for Compressing Condensable. (P) Pulpert. (iv, 1885).....                             | 197      |
| Apparatus for Condensation and Liquefaction of. (P) Pullman and Lane. (xii, 1893).....          | 28       |
| Apparatus for Condensation of:                                                                  |          |
| (Lunge.) (vi, 1887).....                                                                        | 584      |
| (Lunge and Rohrmann.) (vi, 1887).....                                                           | 538      |
| Apparatus for Condensing or Heating. (P) Klein. (ix, 1890).....                                 | 849      |
| Apparatus for Cooling:                                                                          |          |
| (P) Boulton. From Fischer. (vii, 1888).....                                                     | 554      |
| (P) Price. (xiii, 1894).....                                                                    | 1048     |
| Apparatus for Cooling Sulphurous. (P) Albert and others. (viii, 1889).....                      | 119      |
| Apparatus for Destroying Noxious. (P) Keeling. (vi, 1887).....                                  | 222      |
| Apparatus for Detecting. (P) Shaw. (viii, 1889).....                                            | 425      |
| Apparatus for Detecting and Measuring Inflammable. (P) Tichman. (xiii, 1894).....               | 1052     |
| Apparatus for Detecting Explosive:                                                              |          |
| (P) Bosshardt. From Molas. (vii, 1888).....                                                     | 837      |
| (P) Swan. (vii, 1888).....                                                                      | 125      |
| Apparatus for Detecting Inflammable. (P) Fletcher. (xiii, 1894).....                            | 663      |
| Apparatus for Determination of Carbon Dioxide in Furnace. (x, 1891).....                        | 795      |
| Apparatus for Determining Density of. (Meslans.) (xiii, 1894).....                              | 64       |
| Apparatus for Directing Passage and Controlling Speed of. (P) Ross and others. (xii, 1893)..... | 659      |
| Apparatus for Distillation and Liquefaction of. (P) Puppelt and Rigg. (viii, 1889).....         | 970      |
| Apparatus for Drying and Washing. (Walter.) (iii, 1884).....                                    | 580      |
| Apparatus for Effecting Decomposition of. (P) Brock and others. (xiv, 1895).....                | 572, 572 |
| Apparatus for Ejecting or Withdrawing. (P) Edwards. From Rohrmann. (xi, 1892).....              | 422      |
| Apparatus for Expulsion of Noxious, from Solutions. (P) Bohm. (viii, 1889).....                 | 399      |
| Apparatus for Extracting Benzene from. (P) Coates. (iv, 1885).....                              | 485      |
| Apparatus for Extracting Tar and Ammonia from Blast Furnace. (P) Dempster. (iv, 1885).....      | 531      |
| Apparatus for Extraction of:                                                                    |          |
| (P) Cumliffe. (viii, 1889).....                                                                 | 970      |
| (P) Cumliffe and Lund. (vi, 1887).....                                                          | 814      |
| Apparatus for Generating and Hydrating. (P) Clark. From Maynard. (iv, 1885).....                | 213      |
| App. for Generating, from Liquids. (Thiele.) (viii, 1889).....                                  | 1010     |
| App. for Generation of. (Ulbricht and Foerster.) (x, 1891).....                                 | 794      |
| Apparatus for Heating. (P) Mills. From Seigle-Goujon. (x, 1891).....                            | 244      |
| Apparatus for Indicating Explosive. (P) Stern and Kaufmann. (ix, 1890).....                     | 81       |
| Apparatus for Indicating Weight or Volume of. (P) Longdon. From Krupp. (xii, 1893).....         | 745      |
| Apparatus for Inducing Complete Combustion of. (P) Chinnery. (vi, 1887).....                    | 651      |
| Apparatus for Lighting, Extracting, &c., Sewer. (P) Horton. (xiv, 1895).....                    | 767      |
| Apparatus for Manufacture of:                                                                   |          |
| (P) Cosh. (viii, 1889).....                                                                     | 534      |
| (P) Cryer. (x, 1891).....                                                                       | 528      |
| (P) Farinaux. (vi, 1887).....                                                                   | 509      |
| (P) Wood. (ix, 1890).....                                                                       | 1118     |
| Apparatus for Measuring and Delivering. (P) Thompson. From Taylor. (x, 1891).....               | 531      |
| Apparatus for Mixing and Regulating. (P) Hillischeber. (viii, 1889).....                        | 767      |
| App. for Notifying Presence of. (P) Hardy. (xiii, 1894).....                                    | 1031     |
| Apparatus for Photometric Examination of. (P) Foster. (x, 1891).....                            | 244      |
| Apparatus for Production of. (P) Royon. (xi, 1892).....                                         | 842      |

|-------------------------------------------------------------------------------------------------------|------|
| App. for Rapid Determ. of Combustible. (Pond.) (xiii, 1894)                                           | 544  |
| Apparatus for Recovering Ammonia from Various. (P) Wirth. From Philipp. (ii, 1883)                    | 477  |
| Apparatus for Regulating Flow of Compressed. (P) Clarkson and Spurge. (ix, 1890), 734; (xiv, 1895)    | 1036 |
| Apparatus for Removing and Purifying Noxious. (P) Smith. (ix, 1890)                                   | 882  |
| Apparatus for Rendering, Innocuous. (P) Wainwright. (xi, 1892)                                        | 22   |
| App. for Sampling Chimney. (Schmidt.) (ix, 1890)                                                      | 765  |
| App. for Saturating Liquids with. (P) Beins. (xiv, 1895)                                              | 469  |
| App. for Saturating with Vapours. (P) Janks. (xi, 1892)                                               | 508  |
| App. for Separating Dust, &c., from. (P) Simon. (v, 1886)                                             | 653  |
| Apparatus for Separating Liquids or Solids from. (P) Jones. (x, 1891)                                 | 240  |
| Apparatus for Separation of Ammonia from Furnaces. (P) Chapman. (iii, 1884)                           | 415  |
| Apparatus for Treating, by Liquids. (P) Edwards. From Lunce and Rohmann. (ix, 1890)                   | 510  |
| App. for Treating Fabrics, &c., with. (P) Remy. (x, 1891)                                             | 135  |
| Apparatus for Treating Granular Materials by. (P) Hasenclever. (viii, 1889)                           | 194  |
| App. for Treating Liquids with. (Hurter.) (xii, 1893)                                                 | 227  |
| App. for Treating Solids by:                                                                          |      |
| (P) Mond. (vii, 1888)                                                                                 | 833  |
| (P) Wise. From Solvay and Co. (ix, 1890)                                                              | 726  |
| Apparatus for Treating Solids, Semi-Solids, and Liquids with. (P) Melville. (xii, 1893)               | 1013 |
| Apparatus for Treating Substances with. (P) Burdakin. (xii, 1893)                                     | 812  |
| App. for Treating Textiles with. (P) Mather. (viii, 1889)                                             | 460  |
| Apparatus for Treatment of Noxious:                                                                   |      |
| (P) Lacey. (xii, 1893)                                                                                | 371  |
| (P) Makinson. (xi, 1892)                                                                              | 704  |
| Apparatus to Inject, into Liquids. (P) Brin's Oxygen Co., and Goble. (viii, 1889)                     | 759  |
| Arising from the Diffusion Battery, Combustible. (Dewaid.) (xiii, 1894)                               | 749  |
| Blast Furnace, Obtaining Ammonia from. (P) Main and Galbraith. (iv, 1885)                             | 111  |
| Blast-Furnace, Utilisation of. (Arth.) (xiv, 1895)                                                    | 368  |
| Burning Inflammable Explosive. (P) Tyler and De Vescian. (xiv, 1895)                                  | 793  |
| Capacity of Caoutchouc for Absorbing. (Hufner.) (viii, 1889)                                          | 55   |
| Carbon Dioxide in Mixtures of, Estimation of. (Blochmann.) (iii, 1884)                                | 456  |
| Carburisation of. (P) Bremme. (xiv, 1895)                                                             | 142  |
| Carriage of Compressed. (T.R.) (xiv, 1895)                                                            | 779  |
| Cause of Luminosity in Flames of Hydrocarbon. (Lewes.) (xiv, 1895)                                    | 738  |
| Chamber, Determ. of Nitric Oxide in. (Lunge.) (i, 1882)                                               | 14   |
| Changes of, by Dark Electrical Discharges. (P) Van der Steen and Schneller. (xiv, 1895)               | 493  |
| Charging Liquids with. (P) Schneible. (xiv, 1895)                                                     | 765  |
| Chemical Equilibrium of Solution of. (Van Berchem.) (ix, 1890)                                        | 549  |
| Coke-Oven, Apparatus for Obtaining Products of Distillation from. (P) Stroehmer and Scholz. (i, 1882) | 101  |
| Coke-Oven, Examination of Crude Benzene from. (Lunge and von Keler.) (xiv, 1895)                      | 143  |
| Coke-Oven, Recovery of Ammonia in. (Winkler.) (iii, 1884)                                             | 512  |
| Combustible, and Smoke, Analysis of. (Lunge.) (i, 1882)                                               | 13   |
| Combustible, Method and Apparatus for Producing. (P) Thwaite. (ix, 1890)                              | 169  |
| Combustible, Obtaining Ammonia Salts from. (P) Addie. From Addie. (iii, 1884)                         | 159  |
| Combustible, Obtaining, from Coal. (P) Mond. (iii, 1884)                                              | 236  |
| Combustible, Obtaining, from Fuel. (P) Mond. (xiii, 1894)                                             | 968  |
| Combustible, Production and Purification of. (P) Sutherland. (iii, 1884)                              | 369  |
| Combustible, Production of. (P) Thwaite. (vii, 1888)                                                  | 116  |
| Combustion in Dried. (Baker.) (iv, 1885)                                                              | 268  |
| Combustion of, in Furnaces. (P) Hargreaves. (xi, 1892)                                                | 806  |
| Composition of Furnace. (Jurisch.) (xii, 1893)                                                        | 813  |
| Composition of Limiting Explosive Mixtures of, with Air. (Clowes.) (xiv, 1895)                        | 1024 |
| Condensation of, and Extraction of Zinc in Blast Furnace. (Hempel.) (xiv, 1895)                       | 277  |
| Condensers and Towers for. (P) Herman. (vii, 1888)                                                    | 845  |
| Condensing, and App. therefor. (P) Gamgee. (x, 1891)                                                  | 823  |
| Containing Ammonia, Treatment of. (P) Bolton and Wanklyn. (ii, 1883)                                  | 167  |
| Containing Sulphuretted Hydrogen, Treatment of. (P) Heaton. (x, 1891)                                 | 1006 |
| Cyanogen Compounds from, Recovery of. (P) Knabian. (vii, 1888)                                        | 116  |
| Cyanogen from, Obtaining:                                                                             |      |
| (P) Drehschmidt. (xiv, 1895)                                                                          | 742  |
| (P) Leigh. From Elser and Gasch. (x, 1891)                                                            | 926  |
| Cylinders for Containing, under Pressure. (P) Hesketh and Marret. (xiv, 1895)                         | 642  |
| Degree of Exhaustion of. (Jurisch.) (ix, 1890)                                                        | 506  |
| Dehydration of. (P) Mather. (xii, 1893)                                                               | 762  |
| Density of, Determ. of. (P) Freres and Meslans. (xiii, 1894)                                          | 378  |
| Density of, Means for Measuring. (P) Haddan. From Durr and Custodio. (xii, 1893)                      | 710  |
| Deposition of Matter in. (P) Lorrain. (vi, 1887)                                                      | 378  |
| Destroying Furnace, Method of. (P) Urtley. (xii, 1893)                                                | 57   |
| Destroying Noxious, from Chemical Manufactures. (P) Bertram. (viii, 1889)                             | 814  |

| Desulphurisation of. (P) Hood and Salamon. (vii, 1888)                                                                                                | 617      |
| Desulphurising. (P) Lux. (i, 1882)                                                                                                                    | 335      |
| Development of Voltaic Electricity by Oxidation of. (Mond.) (ix, 1890)                                                                                | 42       |
| Diffusibility of, through Caoutchouc Membranes. (Rayerher.) (xiii, 1894)                                                                              | 181      |
| Draught for Poisonous. (Hempel.) (iv, 1885)                                                                                                           | 612      |
| Drying of. (Vander Plaats.) (ix, 1890)                                                                                                                | 415      |
| Electrically Treating. (P) Hald. (xiii, 1894)                                                                                                         | 528      |
| Enclosed in Coal and Coal-dust. (McConnell.) (xiii, 1894)                                                                                             | 25       |
| Enriching with Liquid Hydrocarbons. (P) Dvorkovitz. (xiv, 1895)                                                                                       | 796      |
| Erosive Power of Compressed. (Jaobree.) (ix, 1890)                                                                                                    | 632      |
| Evolved from Steel Castings. (iii, 1884)                                                                                                              | 446      |
| Expanding. (P) Ball. (v, 1886)                                                                                                                        | 316      |
| Exploded by Incandescent Lamps. (vii, 1888)                                                                                                           | 557      |
| Explosion Temperatures of Mixtures of, Determination of. (Meyer and Münch.) (xii, 1893)                                                               | 1017     |
| Filling Cylinders with. (P) Parkinson. (x, 1891)                                                                                                      | 208      |
| Filtering Media for. (P) Candy. (v, 1886)                                                                                                             | 675      |
| Fixed, Means of Generating. (P) Lindsay. (v, 1886)                                                                                                    | 424      |
| For Metallurgical Purposes, Apparatus for Producing. (P) Shedlock and Meldrum. (ix, 1890)                                                             | 611      |
| From Bituminous Fuel, Producing. (P) Ross. (x, 1891)                                                                                                  | 824      |
| From Blast Furnaces, Examination of Tars Recovered in Condensation of. (Smith.) (ii, 1883)                                                            | 495, 500 |
| From Blast Furnaces, Process and Apparatus for Treating. (P) The Coltness Iron Co., Ltd., and Young. (ix, 1890)                                       | 1120     |
| From Blast Furnaces, Utilisation of Waste. (Schradner and Maces, Zirmann, Belani, Alexander, Korting Bros., Young and Beilby, Ehrenwerth.) (iv, 1885) | 217      |
| From Blast Furnaces, Zinc and Lead in. (Vita.) (ix, 1890)                                                                                             | 512      |
| From Carbonisation of Coal, Utilising. (P) Dunlop. (xiv, 1895)                                                                                        | 261      |
| From Chance-Claus Sulphur Process, Treatment of Waste. (Kynaston.) (xii, 1893)                                                                        | 319      |
| From Coal, Obtaining. (P) Kenyon. (iii, 1884)                                                                                                         | 435      |
| From Coke Ovens, Treatment of. (P) Simon. From Carves. (iv, 1885)                                                                                     | 828      |
| From Coke Ovens, Utilisation of. (P) Nicholson. (iii, 1884)                                                                                           | 369      |
| From Combustion of Iron Pyrites, Composition of. (Scheuer-Kestner.) (iv, 1885)                                                                        | 457      |
| From Dynamite, Poisons. (Charon.) (xi, 1892)                                                                                                          | 840      |
| From Furnaces in Harz Forests, Injurious Effects of. (Reuss.) (i, 1882)                                                                               | 29       |
| From Furnaces, Treating. (P) Davy. (xi, 1892)                                                                                                         | 21       |
| From Hydrocarbon Oil and Water. (P) Darby. (ix, 1890)                                                                                                 | 275      |
| From Liquid Hydrocarbons, Manufacture of, and Apparatus therefor. (P) Burnas. (vi, 1887)                                                              | 590      |
| From Mines, Apparatus for Testing. (P) Shaw. (vi, 1887)                                                                                               | 751      |
| From Salted Furnaces, Analyses of. (Hunt.) (iii, 1884)                                                                                                | 91       |
| From the Distillation of Petroleum, &c., Utilising Hydrocarbon. (P) Beilby and McArthur. (vi, 1887)                                                   | 212      |
| Fuel Value of. (Payne.) (xii, 1893)                                                                                                                   | 1016     |
| Furnace, Obtaining Ammonia from. (P) Addie. (ii, 1883)                                                                                                | 264      |
| Furnace, Recovery of Sulphurous Acid from. (Hanisch and Schroeder.) (iii, 1884)                                                                       | 570      |
| Furnace, Separation of Ammoniacal Products and Tar from. (P) Mond. (v, 1885)                                                                          | 235      |
| Furnace, Sulphur from. (P) Hanisch and Schroeder. (iv, 1883)                                                                                          | 487      |
| Furnaces for Generation of Heating. (P) Blum. (xi, 1893)                                                                                              | 584      |
| Glass Vessels for Storing, Manufacture of. (P) Rylands. (x, 1891)                                                                                     | 927      |
| Graduation of Tubes for Measuring. (Berthelot.) (vii, 1888)                                                                                           | 645      |
| Heat Abstracted by Expansion of. (Lightfoot.) (v, 1886)                                                                                               | 139      |
| Heating of, by Electricity. (P) Donaldson. (xiii, 1894)                                                                                               | 529      |
| Hydrocarbon, Manufacture of. (P) Lake. From Fogarty. (iii, 1884)                                                                                      | 474      |
| Hydrocarbons from, Obtaining. (P) Friedlander and Quaschnig. (vi, 1887)                                                                               | 505      |
| Ignition Temperatures of Mixtures of. (Meyer and Freyer.) (xii, 1893)                                                                                 | 437      |
| Illuminating and Heating, Manufacture of:                                                                                                             |          |
| (P) Dinsmore. (xi, 1892)                                                                                                                              | 149      |
| (P) Fourness. (xi, 1892)                                                                                                                              | 149      |
| Inert, Obtaining of. (P) Mond and Besselman. (viii, 1889)                                                                                             | 646      |
| In Lead Chamber, Distribution and Condensation of. (Maeter.) (iii, 1884)                                                                              | 224      |
| In Steel. (Müller.) (iv, 1885)                                                                                                                        | 676      |
| In Water, Krenslor's Nitric Acid Apparatus for Extraction of Dissolved. (Robson.) (xi, 1892)                                                          | 504      |
| Influence of, on Porcelain Colours. (Damoar.) (xiv, 1895)                                                                                             | 484      |
| Injurious Action of. (Pettenkofer and Lehmann.) (vii, 1888)                                                                                           | 225      |
| Injury Done to Vegetation by Noxious. (Hamburger.) (iii, 1884)                                                                                        | 202, 342 |
| Kills for Treating Waste. (P) Johnstone. (x, 1891)                                                                                                    | 771      |
| Legislation re Noxious. (Muspratt.) (First Proceedings)                                                                                               | 7        |
| Legislation Restraining Emission of Noxious. (Fletcher.) (xi, 1892)                                                                                   | 120, 306 |
| Light, Heat, and Power from certain, Production of. (P) Tatham. (ix, 1890)                                                                            | 171      |
| Lighting by Calciferic, and Apparatus therefor. (P) Macaulay-Cruikshank, From Reissig and others. (x, 1891)                                           | 453      |
| Liquefied. (T.R.) (vii, 1888)                                                                                                                         | 650      |

| PAGE                                                                                                                  | PAGE                                                                                                     |

| Liquid Anhydrous Sulphurous Acid from Furnace and other. (P. Haensch and Schroeder. (ix. 1883).....                   | Mixtures, Temp. of Explosion of. (Meyer.) (xii. 1893).....                                               |
| Means for Operating Cocks and Valves of Cylinders containing. (P. Manchester Oxygen Co. and Jackson. (xii. 1893)..... | Pressures, Closure for Regulation of. (P. Mills and Ellis. (ix. 1892).....                               |
| Method and App. for Producing. (P. Thwaite. (x. 1891).....                                                            | Products of Combustion of Coal. (Scheurer-Kestner.) (iv. 1883).....                                      |
| Methods of Treating Liquids with compared. (Harter.) (iv. 1885).....                                                  | Products of Combustion, Utilisation of. (P. Biederman and Harvey. (iv. 1885).....                        |
| Mixing and Stratification of. (Leybold.) (xii. 1883).....                                                             | Gas-lighting Apparatus, Regenerative. (P. Bower and Thorp. (iii. 1884).....                              |
| Motion of in Ducts and Towers. (Jurisch. (xii. 1894).....                                                             | Gasogenes, Compound for Use in. (P. Grimshaw. (x. 1891).....                                             |
| Noxious, Preventing Escape of. (P. Kern. (xi. 1892).....                                                              | Gasometer, Spherical. (Ehrenberg.) (vi. 1887).....                                                       |
| Noxious, Use of Chamber Crystals for Decomposing. (P. Girard and Pabst. (i. 1882).....                                | Gassing Apparatus for Silks. (P. Ideson. (xi. 1892).....                                                 |
| Obnoxious, Means for Destroying. (P. Baker. (xiii. 1894).....                                                         | Gastrolabium. (Jackson.) (xiii. 1894).....                                                               |
| Occided by Coke. (Storer and Lewis. (ii. 1883).....                                                                   | Gasworks Apparatus, Dimensions of. (Reissner. (xiv. 1895).....                                           |
| Occided in Coal. (Bedson. (vii. 1888).....                                                                            | Dry-valve Commutator for. (P. Week. (ii. 1883).....                                                      |
| Of Blast Furnaces, Utilisation of. (P. Alexander and McCosh. (i. 1882).....                                           | Exam. of Ammoniacal Liquor of. (Dyson.) (ii. 1883).....                                                  |
| Oil- and Water, Manufacture of. (P. Thwaite. (x. 1891).....                                                           | Experimental Data, Paris. (Devilla. (viii. 1889).....                                                    |
| Or Air, Apparatus for Treating Substances with. (P. Beck. (viii. 1889).....                                           | Hydraulic Mains for. (P. Abel. (From Alavoine. (v. 1886).....                                            |
| Oxidation and Chemical Properties of. (Phillips.) (xiii. 1894).....                                                   | Treating Spent Lime from. (P. Lark. (iii. 1884).....                                                     |
| Passage of from Pyrites Burners to Lead Chambers. (Scheurer-Kestner.) (iv. 1885).....                                 | Utilisation of Residual Products in. (Lewis. (v. 1886).....                                              |
| Phenomena of Oxidation and Chemical Properties of. (Phillips.) (xiii. 1894).....                                      | Utilisation of Waste Lime from. (P. Ransome. (i. 1882).....                                              |
| Porous Surfaces for Absorption of. (P. Glew. (viii. 1889).....                                                        | Gauze for Liquids. (P. Horley and Sargley. (ix. 1890).....                                               |
| Preparation of, for Analyses, and Apparatus therefor. (Ehrenberg.) (vi. 1887).....                                    | Standard Wire. (xii. 1894).....                                                                          |
| Preventing, from Intermingling while passing through Liquids. (P. Hillard. (xii. 1894).....                           | With Self-Acting Closing Arrangement, Water. (P. Sempnell. (i. 1883).....                                |
| Producers, &c., for Mannf. of. (P. Deighton. (viii. 1889).....                                                        | Gauze-Glasses for Automatic Closing of Stop-Cocks, Arrangements in. (P. Heppner. (ii. 1882).....         |
| Pumps for Compressing. (P. Labinal. (xiv. 1895).....                                                                  | Of Boilers, Luminous Float for. (P. Schlag and Berend. (i. 1882).....                                    |
| Pumps for Condensable. (P) Pulpitt. (From Doran. (iv. 1885).....                                                      | Gauges for Liquids. (P) Hicks. (v. 1886).....                                                            |
| Pumps for Pumping or Compressing. (P) Murray. (xii. 1894).....                                                        | Gaultherine from Berula Lenta. (Schneegans and Gerlach.) (xiv. 1895).....                                |
| Purification of:.....                                                                                                 | Gautier's Investigations on Ferro-silicon and Iron. (Wedding.) (vi. 1887).....                           |
| (P) Andrews. (ix. 1890).....                                                                                          | Gauze, Prep. of Carbolic and Iodoform. (Danz.) (v. 1888).....                                            |
| (P) Solvay. (viii. 1889).....                                                                                         | Preparing and Rendering Antiseptic. (P) Tichenborne and Henston. (x. 1891).....                          |
| Purification of, and Apparatus. (P) Gontard. (v. 1883).....                                                           | Gay-Lussac Tower, Loss of Nitre by. (Lunge and Naef. (iii. 1884).....                                    |
| Qualitative Reactions of. (Phillips.) (viii. 1884).....                                                               | Towers, Distribution of Liquid in. (Lunge.) (ix. 1890).....                                              |
| Rate of Explosions in. (Dixon.) (x. 1891).....                                                                        | Gayon's Test for Aldehyde. (Borntraeger.) (x. 1891).....                                                 |
| Refinery, Removal of Sulphurous Acid from. (Fleissmann.) (i. 1882).....                                               | Gedda Gums. (O'Sullivan.) (xi. 1892).....                                                                |
| Removal of, in Casting Metal. (P) Sobenius. (xii. 1892).....                                                          | Geddie Acid. (O'Sullivan.) (vi. 1892).....                                                               |
| Removal of from Metals or Alloys. (P) Sobenius. (ix. 1890).....                                                       | Gehe and Co.'s Report on Carbolic Acid, &c. (F.E. (x. 1890).....                                         |
| Resulting from Fermentation, &c., Utilisation of. (P) Abel. (From Meuss. (xiv. 1895).....                             | Geissospermine. (Freund and Faure.) (xii. 1893).....                                                     |
| Risks of High-pressure. (Badenberger and Heyn. (xi. 1892).....                                                        | Gelatin, Absorption of Gaseous Antiseptics by. (Riedlin.) (viii. 1888).....                              |
| Scrubbing of. (Mills.) (x. 1891).....                                                                                 | Action of Alcoholic Soda Solution on. (Paal and Schilling.) (xiv. 1895).....                             |
| Scrubbing or Purifying. (P) Seeman. (xiv. 1895).....                                                                  | Action of, on Saline Solutions. (Mills and Sawers.) (xiv. 1895).....                                     |
| Separating Carbonic Acid from. (P) MacCallum. (From Reissner and Landin. (x. 1891).....                               | Apparatus for Drying. (P) Thompson. (From Krauseder and Lentsch. (xi. 1892).....                         |
| Separ. and Purif. of Mixed. (P) Lonsdon. (xi. 1892).....                                                              | Application of Bichromated. (Lazar.) (xi. 1894).....                                                     |
| Separation of Ammonia from Mixtures of. (Wellstein.) (iv. 1885).....                                                  | Coloured, for Decorative Purposes. (P) McLean. (xi. 1892).....                                           |
| Separation of, from each other. (P) Alexander. (From Hantz. (i. 1882).....                                            | Compounds, Analysis of. (Sanford.) (xi. 1892).....                                                       |
| Slide Rule for Reducing Volumes of, to Normal Condition. (Harter.) (vi. 1888).....                                    | Decomp. of, & Anaerobic Bacteria. (Soltzeny. (x. 1890).....                                              |
| Solubility of, in Water. (Winkler. (x. 1891).....                                                                     | Elastic Leather from Textures containing. (P) Groth. (From Graue. (v. 1886).....                         |
| Specific Heats of, at High Temp. (Clark.) (v. 1886).....                                                              | Emulsion, Ammonia in the. (viii. 1889).....                                                              |
| Statistics of Escape of Acid. (T.R.) (vi. 1887).....                                                                  | Emulsion by Silver Carbonate. (P) Lunge. (viii. 1888).....                                               |
| Stored under Pressure, Apparatus for Discharge of. (P) Vincent. (viii. 1889).....                                     | Explosives. See under Explosives.....                                                                    |
| Table of Acid, escaping in Various Districts. (xi. 1892).....                                                         | Extract, of, from Animal Matter. (P) Ekman. (iii. 1884).....                                             |
| Testing Pyrites Burner and Chamber Exit. (Lunge.) (ix. 1890).....                                                     | Extraction of from Waste and Bones. (P) Bertram. (xi. 1892).....                                         |
| Titration of Small Quantities of, in Mixtures. (Behrend and Kast.) (viii. 1889).....                                  | Films Enlarging Photographic. (P) Hill. (xi. 1892).....                                                  |
| Treating Fibres with. (P) Gessler. (xi. 1892).....                                                                    | Films, Manufacture of. (P) Freedman. (vi. 1887).....                                                     |
| Treating Fires, in Furnaces. (P) Patterson. (xiv. 1895).....                                                          | German Trade in. (T.R.) (xii. 1894).....                                                                 |
| Treating Liquids with:.....                                                                                           | Glue and Sae from Bones and Animal Waste. (P) Hobson. (viii. 1889).....                                  |
| (Harter.) (vi. 1887).....                                                                                             | Manufacture of:.....                                                                                     |
| (P) Massey-Mainwaring, and Edmunds. (v. 1886).....                                                                    | (P) Huot. (i. 1882).....                                                                                 |
| Treating, to render Vitreous. (P) Scudder and Colman. (x. 1891).....                                                  | (P) Johnson. (From Huot. (i. 1882).....                                                                  |

| (P) Dvorkovitz and others. (xi, 1892).....                                                         | 152  |
| (P) Yeaton and Adgie. (xii, 1893).....                                                             | 439  |
| Apparatus for Gasifying Non-Gaseous. (P) Siemens. (xiii, 1894).....                                | 139  |
| Apparatus for Generating Gas from:                                                                 |      |
| (P) Berland. (i, 1882).....                                                                        | 397  |
| (P) Boulton. (iv, 1885).....                                                                       | 208  |
| (P) Marsh. (vi, 1887).....                                                                         | 590  |
| Apparatus for Manufacturing Gas from Fluid:                                                        |      |
| (P) Dvorkovitz. (xii, 1893).....                                                                   | 1018 |
| (P) Howell and Smith. (ix, 1890).....                                                              | 850  |
| (P) Meeze. (vi, 1887).....                                                                         | 719  |
| Apparatus for Mixing, with Earth for Fuel. (P) Thompson. From Leede and Ouray. (iv, 1885).....     | 48   |
| Apparatus for Purifying. (P) Walker. (i, 1882).....                                                | 398  |
| Apparatus for Utilising Liquid. (P) Doty. (x, 1891).....                                           | 353  |
| Apparatus for Vaporising. (P) The Gas Lighting Company and Crookford. (xiv, 1895).....             | 20   |
| Apparatus for Vaporising and Burning. (P) Bussey. (vi, 1887).....                                  | 503  |
| Apparatus for Vaporising Liquid. (P) Owen. (xiv, 1895).....                                        | 561  |
| Appliances for Burning. (P) Wilson and Mason. (ix, 1890).....                                      | 924  |
| Burner for Liquid. (P) Peacock. (xiv, 1895).....                                                   | 19   |
| Burners for Heavy. (P) Thompson. From Huff. (xiv, 1895).....                                       | 710  |
| Burners for High-Boiling. (P) Schwarz and Huppertsberg. (i, 1882).....                             | 393  |
| Burning, and Apparatus therefor. (P) Thompson. From Mason and Wilson. (x, 1891).....               | 628  |
| Collecting Volatile Products from. (P) Byron, Wigan, and Bennett. (iv, 1885).....                  | 200  |
| Combination of, with Picric Acid. (Tilden and Forster.) (xiii, 1894).....                          | 172  |
| Combustible Gases from Liquid, Production of. (P) Thwaite. (vii, 1888).....                        | 116  |
| Combustion of Liquid, with Water, Gas, or Steam. (P) Selwyn. (iv, 1885).....                       | 48   |
| Constant for Analysis of. (Crismier.) (xiv, 1895).....                                             | 1069 |
| Decomposition of. (Armstrong and Miller.) (v, 1886).....                                           | 374  |
| Distillation and Breaking up of Liquid. (P) Clark. (xii, 1894).....                                | 381  |
| Distillation of:                                                                                   |      |
| (P) McGowan. (i, 1882).....                                                                        | 352  |
| (P) Pielsticker. (x, 1891).....                                                                    | 631  |
| Distill. of Liquid, and App. therefor. (P) Burns. (vi, 1887).....                                  | 590  |
| Distilling and Refining. (P) Ryeroff and Mason. (x, 1891).....                                     | 456  |
| Enriching Gases by Liquid. (P) Dvorkovitz. (xiv, 1895).....                                        | 796  |
| Enrichment of Coal-Gas by. (Davis.) (v, 1886).....                                                 | 2    |
| Extraction of, from Coal-Tar. (P) Clark. (xii, 1894).....                                          | 797  |
| For Substitutes for Wax, Bleaching. (P) Huray. From Chemin. (iii, 1884).....                       | 163  |
| Formation of Higher Aromatic. (Boyen.) (viii, 1889).....                                           | 974  |
| Formed in Manufacture of Compressed Gas, Pyrogenic. (Brochet.) (xi, 1892).....                     | 596  |
| From American Petroleum. (Lemoine.) (iii, 1884).....                                               | 234  |
| From Coal-Gas, Volatile. (P) Drew. (iii, 1884).....                                                | 438  |
| From Tars and Oils from Blast Furnaces and Gas Producers, Production of. (P) Bell. (iv, 1885)..... | 531  |
| Furnaces for Burning. (P) Findlay. (ii, 1883).....                                                 | 264  |
| Furnaces for Burning Liquid. (P) Mundell and Gordon. (ii, 1883).....                               | 263  |
| Gaseous at Ordinary Temperatures, Absorption of. (Hassengruff.) (i, 1882).....                     | 398  |
| Gasification of Liquid. (Dvorkovitch.) (xii, 1893).....                                            | 403  |
| Generating Gas from Liquid, Method and Apparatus for. (P) Avery. (vi, 1887).....                   | 719  |
| Generating Gases from, and Apparatus therefor. (P) Thwaite. (x, 1891).....                         | 538  |
| Illuminating Power of. (Frankland.) (iv, 1885).....                                                | 267  |
| In American Petroleum. (Lemoine.) (iii, 1884).....                                                 | 514  |
| In Fats, Detection of. (Nitsche.) (iii, 1884).....                                                 | 322  |
| Incondensence Lamps for Liquid. (P) Marcus. (xiv, 1895).....                                       | 562  |
| Manufacture of Gas from Fluid:                                                                     |      |
| (P) Lewes. (xii, 1893).....                                                                        | 511  |
| (P) Meeze. (vii, 1888).....                                                                        | 115  |
| (P) Pinkney. (xiv, 1895).....                                                                      | 645  |
| Manufacture of Liquid. (P) Balfour and Lane. (v, 1886).....                                        | 522  |
| Manufacture of Oleaginous Material from. (P) Dahnzen. (viii, 1889).....                            | 991  |
| Manuf. or Treatment of Mineral. (P) Banner. (vi, 1887).....                                        | 134  |
| Melting Points of Mixtures of. (Vignon.) (xi, 1892).....                                           | 235  |
| Method and Apparatus for Burning. (P) Hill and Brett. (xiii, 1894).....                            | 139  |
| Method and Apparatus for Manufacture of. (P) Cattanaeh. (v, 1886).....                             | 40   |
| Methylation of. (Jacobsen.) (i, 1882).....                                                         | 101  |
| Mixing with Steam and Air. (P) Avery. (iii, 1884).....                                             | 473  |
| Motor Driven by Air and Liquid. (P) Etève and Lallement. (ii, 1883).....                           | 162  |
| Obtained by Compression of Petroleum Gas. (Williams.) (iii, 1884).....                             | 437  |

## Hydrocarbons—cont.

|                                                                                                              |      |
|--------------------------------------------------------------------------------------------------------------|------|
| Obtaining. (P) Davis. (iii, 1884).....                                                                       | 369  |
| Obtaining from Gases. (P) Friedländer and Quaglio. (vi, 1887).....                                           | 505  |
| Obtaining from Oils and Tars from Coke Ovens. (P) Bell. (iv, 1885).....                                      | 337  |
| Obtaining Gas from. (P) Schnell, Read, Warwick, and Derbyshire. (iv, 1885).....                              | 450  |
| Occurrence of Solid, in Plants. (Abbot and Trimble.) (vii, 1888).....                                        | 757  |
| Of Essence of Valerian. (Oliviero.) (xiii, 1894).....                                                        | 758  |
| Perhydrides of the Higher Aromatic. (Liebermann and Spiegel.) (viii, 1889).....                              | 451  |
| Preparation of, from Oils. (Redl.) (vi, 1887).....                                                           | 503  |
| Preventing Spontaneous Ignition of Liquid. (P) Richter. (xiii, 1894).....                                    | 1192 |
| Producing Smokeless Flame from Liquid. (P) Lee and Lancaster. (xii, 1893).....                               | 1020 |
| Production of Light. (Riebeck.) (vi, 1887).....                                                              | 282  |
| Production of Oil-Gas from Terpene Series of. (xiii, 1894).....                                              | 501  |
| Purification of Alcohol by. (Squire.) (viii, 1889).....                                                      | 441  |
| Recovery of, from Gas. (Davis.) (ii, 1883).....                                                              | 515  |
| Recovery of, from Sulphonic Acids. (Kelbe.) (v, 1886).....                                                   | 317  |
| Refining. (Redl.) (vi, 1887).....                                                                            | 504  |
| Rendering Liquid, Non-Explosive. (P) Kirsch. (x, 1891).....                                                  | 996  |
| Reverse Action of Friedl and Craft's Method of Preparing. (Jacobsen.) (iv, 1885).....                        | 270  |
| Saponifying. (P) Sablstrom and Parr. (xiii, 1894).....                                                       | 139  |
| Separating Coal-Tar, from those of Petroleum. (Henriques.) (xiv, 1895).....                                  | 604  |
| Solid, in Petroleum. (Morton.) (i, 1882).....                                                                | 142  |
| Solid, in the Vegetable Kingdom. (Gutzeit.) (viii, 1889).....                                                | 124  |
| Storing Highly Volatile. (P) Thwaite. (xi, 1892).....                                                        | 512  |
| Treating. (P) Field. (v, 1886).....                                                                          | 449  |
| Treatment of Liquid. (P) Stringfellow. (x, 1891).....                                                        | 534  |
| Treatment of, to obtain various Products. (P) Wise and Schmeller. (xiii, 1894).....                          | 160  |
| Treatment or Solidification of Liquid. (P) Ridsdale. (xii, 1893).....                                        | 363  |
| Use of, for Reducing Pyrites. (P) Thwaite and Pedder. (v, 1886).....                                         | 379  |
| Utilising Liquid. (Hill and Brett.) (xii, 1893).....                                                         | 588  |
| Volatile, from Coal and Shale Gas. (P) Drew. (iii, 1884).....                                                | 475  |
| Hydrocellulose and its Derivatives. (Girard.) (i, 1882).....                                                 | 316  |
| Treatment of. (Girard.) (i, 1882).....                                                                       | 159  |
| See also under Cellulose.                                                                                    |      |
| Hydrochloric Acid, Action of Dilute, on Starch. (Allihn.) (iii, 1884).....                                   | 323  |
| Acid, Action of Gaseous, on Burnt Pyrites. (Blattner and Kestner.) (xii, 1893).....                          | 925  |
| Acid, Action of Gaseous, on Platinum Metals. (Dudley.) (xiii, 1894).....                                     | 255  |
| Acid, Action of Isovaleraldehyde on Fuming. (Spady.) (v, 1886).....                                          | 162  |
| Acid, Action of, on Antimony. (Ditte and Metzner.) (xii, 1893).....                                          | 358  |
| Acid, Action of, on Antimony Sulphide. (Lang.) (v, 1886).....                                                | 30   |
| Acid, Action of, on Bismuth. (Ditte and Metzner.) (xii, 1893).....                                           | 358  |
| Acid, Action of, on Caffeine. (Schmidt.) (ii, 1883).....                                                     | 361  |
| Acid, Action of, on Product Calcination of Manganese Residues. (Reychler.) (xi, 1892).....                   | 34   |
| Acid, Action of, on Nitrosodimethylaniline. (Mohlan.) (v, 1886).....                                         | 597  |
| Acid, Action of, on Silver Mercurous Chloride. (Jones.) (xii, 1893).....                                     | 986  |
| Acid, Action of, on Solubility of Cuprous and Lead Chlorides. (Engel.) (viii, 1889).....                     | 883  |
| Acid, Action of, on Sucrose. (Weber and McPherson.) (xiv, 1895).....                                         | 498  |
| Acid, Action of, on Xanthine. (Schmidt.) (ii, 1883).....                                                     | 360  |
| Acid and Ammonia from Ammonium Chloride, Obtaining. (P) Mond. (vi, 1887).....                                | 140  |
| Acid and Chlorine, Estimation of, in Mixture. (Younger.) (viii, 1889).....                                   | 88   |
| Acid and Chlorine, Manufacture of. (P) Clark. From Daguin. (viii, 1889).....                                 | 194  |
| Acid and Chlorine, Manufacture of, from Magnesium Chloride. (Eschellmann.) (viii, 1889).....                 | 190  |
| Acid and Nitric Acid, Manufacture of Chlorine from. (P) Johnson. From the Verein Chem. Fab. (xiv, 1895)..... | 483  |
| Acid and Oxalic Acid, Relative Affinities of, for Ferric Oxide. (Lemoine.) (xii, 1893).....                  | 760  |
| Acid and Quinine, Compounds of. (Hesse.) (xi, 1892).....                                                     | 176  |
| Acid and Sulphuric Acid for Decomposition of Chlorides, &c. (P) Pedder. (xi, 1892).....                      | 815  |
| Acid, Apparatus for Producing Gaseous. (P) Wise. From Solvay and Co. (ix, 1890).....                         | 941  |
| Acid, Apparatus for Treating. (P) Hargreaves and Robinson. (ii, 1883).....                                   | 477  |
| Acid, Condensation of Butaldehyde with. (Kahn.) (v, 1886).....                                               | 161  |
| Acid, Condensation of, by Lunge-Rohmann Tower. (Lasche.) (xiv, 1895).....                                    | 804  |
| Acid, Conference of Manufacturers of. (T.R.) (viii, 1889).....                                               | 934  |
| Acid, Decomposition of Sodium Thiosulphate by. (Vaubel.) (viii, 1889).....                                   | 705  |
| Acid, Detection of. (Villiers and Fayolle.) (xiii, 1894).....                                                | 1091 |
| Acid, Detection of Arsenic in. (Hager.) (v, 1886).....                                                       | 617  |
| Acid, Detection of, in Vinegar. (Hager.) (v, 1886).....                                                      | 500  |

## Hydrochloric—cont.

| Acid or Chlorine from Calcium Chloride. (P) Bramley. (vii, 1888).....                                             | 437                                                                                 |
| Acid or Chlorine, Production of. (P) Clark. From Daguin. (viii, 1889).....                                        | 193                                                                                 |
| Acid, Prod. of Chlorine from. (P) Lorenz. (xiv, 1895) ..                                                          | 272                                                                                 |
| Acid, Production of Chlorine from Gaseous: (P) De Wildt and Reychler. (ix, 1890).....                             | 510                                                                                 |
| (P) Krause. (xiv, 1895).....                                                                                      | 865                                                                                 |
| Acid, Production of, in Glass Manufacture. (P) Walker. (x, 1891).....                                             | 643                                                                                 |
| Acid, Prod. of, in United States. (Martyn.) (iv, 1885).....                                                       | 28                                                                                  |
| Acid, Production of Strong. (P) Lyte and Steinbart. (xi, 1892).....                                               | 161                                                                                 |
| Acid, Proportion of Water to, on Igniting Mixtures of H, O, and Cl. (Hautefeuille and Margottet.) (ix, 1890)..... | 184                                                                                 |
| Acid, Purifying, for Manufacture of Chlorine. (P) Wigg. (i, 1882).....                                            | 454                                                                                 |

## Hydrochloric—cont.

PAGE

|                                                                                                                                          |          |
|------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Acid, Reagent for Free Chlorine in. (Le Roy.) (ix, 1890).....                                                                            | 654      |
| Acid, Recovery of, from Ferrous Chloride. (P) d'Andria. (xii, 1893).....                                                                 | 263      |
| Acid, Removing Arsenic from. (Beekurts.) (v, 1886).....                                                                                  | 534      |
| Acid, Results of Lunge-Rohrmann Plate-Towers for Condensing. (Lunge.) (xiii, 1894).....                                                  | 1034     |
| Acid, Saccharification of Wood-Gum by. (Councler.) (xii, 1893).....                                                                      | 455      |
| Acid, Selenium in. (Davis.) (ii, 1883).....                                                                                              | 157      |
| Acid, Separation of Arsenic by Methyl Alcohol and. (Friedheim and Michaelis.) (xiv, 1895).....                                           | 887      |
| Acid, Separation of Arsenic, &c. from. (P) Whitehead and Gelstharp. (xiv, 1895).....                                                     | 865      |
| Acid, Separation of Arsenic from. (P) d'Andria. (viii, 1888).....                                                                        | 45       |
| Acid, Solubility of Active Principles of Cinchonas in Dilute. (Landrin.) (viii, 1889).....                                               | 640      |
| Acid, Solubility of Calcium Sulphate in Dilute. (Lunge.) (iv, 1885).....                                                                 | 31       |
| Acid Solution, Ferrous Oxide in. (Kessler.) (i, 1882).....                                                                               | 516      |
| Acid, Solution of Chrome Iron Ore by. (Jannasch and Vogtherr.) (x, 1891).....                                                            | 1037     |
| Acid, Tanks for. (P) Owens. (xii, 1893).....                                                                                             | 1030     |
| Acid, Testing, for presence of Sulphuric Acid. (Lunge.) (i, 1882).....                                                                   | 16       |
| Acid Towers, Distribution of Liquid in. (Lunge.) (ix, 1890).....                                                                         | 66       |
| Acid, Transport of. (P) Enzland. (xiv, 1895).....                                                                                        | 750      |
| Acid, Treating Residual Liquid from Pickling Iron or Steel with. (P) Saunders. (ix, 1890).....                                           | 292      |
| Acid, Treating, to obtain Chlorine. (P) Hargreaves and others. (vi, 1887).....                                                           | 367      |
| Acid, Treating Water with. (Macnab and Beckett.) (v, 1886).....                                                                          | 267      |
| Acid Vapours, Injurious Effect of, on Vegetation. (Konig.) (iv, 1885).....                                                               | 540      |
| Acid, Volatility of Nickel in. (Schützenberger.) (xi, 1892).....                                                                         | 243      |
| Acids of different Strengths, Specific Gravity of. (Lunge and Marchlewski.) (x, 1891).....                                               | 541      |
| See also under Muriatic Acid.                                                                                                            |          |
| Hydrochloride, Hydrastinine. (Merck.) (xi, 1892).....                                                                                    | 545      |
| Hydrochlorides of the Chlorides. (Engel.) (viii, 1889).....                                                                              | 883      |
| Hydro-cinnamic Acid ( $\beta$ -Phenyl Propionic Acid). (viii, 1889).....                                                                 | 565      |
| Hydrocotone, a Constituent of the Coto Bark, (Ciamician and Silber.) (x, 1891).....                                                      | 383      |
| Hydrocyanic Acid, Action of, on Calomel. (Fouquet.) (ix, 1890).....                                                                      | 101      |
| Acid, Analytical Notes on. (Siebold.) (iii, 1884).....                                                                                   | 456      |
| Acid, Detection of: (Autenrieth.) (xiii, 1894).....                                                                                      | 843      |
| (Portmann.) (v, 1886).....                                                                                                               | 679      |
| Acid, Estimation of. (Gregor.) (xiii, 1894).....                                                                                         | 176      |
| Acid, Production of. (P) de Lambilly. (xiii, 1894).....                                                                                  | 38       |
| Hydrocyanosulphuric Acid, Constitution of. (Fischer and Jennings.) (xiii, 1894).....                                                     | 142      |
| Hydro-Extractor. (P) Tolson. (xiv, 1895).....                                                                                            | 259      |
| -Extractor, Simple Laboratory. (Kailbaum.) (xiv, 1895).....                                                                              | 387      |
| -Extractors, Cages of. (P) Collins and Kaye. (xi, 1892).....                                                                             | 895      |
| -Extractors for Extracting Sugar Juice. (P) Mewburn. (xi, 1892).....                                                                     | 931      |
| -Extractors with Continuous Action. (P) Strobbach. (iii, 1884).....                                                                      | 114      |
| See also under Centrifugal Machines.                                                                                                     |          |
| Hydrofluoric Acid, Action of, on Crystallised Silicon. (Newth.) (xiv, 1895).....                                                         | 1074     |
| Acid, Action of, on Gutta-Serena. (Hampe.) (x, 1891) ..                                                                                  | 484      |
| Acid and Fluorides, Uses for. (ix, 1890).....                                                                                            | 1055     |
| Acid and Lactic Treatment of Yeast. (Scheibner.) (xiv, 1895).....                                                                        | 1056     |
| Acid, Apparatus for Preparing. (Hempel.) (iv, 1885).....                                                                                 | 612      |
| Acid, Capacity of Yeast to Live in Media containing. (Sarel.) (xiii, 1894).....                                                          | 653      |
| Acid, Compounds of, with Water. (Metzner.) (xiv, 1895).....                                                                              | 364      |
| Acid, Etching Glass by. (Reinitzer.) (v, 1886).....                                                                                      | 669      |
| Acid in Dresden. (T.R.) (vii, 1888).....                                                                                                 | 701      |
| Acid, Purification of Yeast by. (Jorgensen and Holm.) (xii, 1893).....                                                                   | 777      |
| Acid, Treating Yeast with. (Cluss.) (xiv, 1895).....                                                                                     | 52       |
| Acid, Use of, in Distillation of Alcohol. (Schishkoff.) (xi, 1892).....                                                                  | 627      |
| Acid, Use of, in Distilleries. (Vincent.) (xi, 1892).....                                                                                | 626      |
| Acid, Use of, in Manufacture of Yeast. (Wittelschofer.) (xiv, 1895).....                                                                 | 1056     |
| Hydrofluosilicic Acid, Apparatus for Preparing. (Hempel.) (iv, 1885).....                                                                | 612      |
| Hydrogen, Absorption of, by Palladium. (Wilm.) (xi, 1892).....                                                                           | 465      |
| Action of Nascent, upon Pyrrol. (Ciamician and Dendstedt.) (i, 1882).....                                                                | 398, 442 |
| Action of, on Oxygen. (Dixon.) (v, 1886).....                                                                                            | 370      |
| Action of Sulphuretted, on Zinc Sulphate. (Baubigny.) (viii, 1889).....                                                                  | 216      |

| And Steel, Phosphorus in Pig. Estimation of. (Kulmann.) (v, 1886).....                                        | 176                  |
| And Steel Plates in Cold Nitric Acid, Relative Passivity of Wrought. (Andrews.) (xi, 1892).....               | 610                  |
| And Steel, Pneumatic Process of Manufacturing. (P) Wilson and others. (viii, 1889).....                       | 425                  |
| And Steel Process, A New Direct. (Bromfield.) (i, 1882).....                                                  | 363                  |
| And Steel Production in 1890. (T.R.) (x, 1891).....                                                           | 958                  |
| And Steel, Prod. of, direct from Ore. (T.R.) (vi, 1887).....                                                  | 755                  |
| And Steel, Role of Foreign Bodies in. (Osmond.) (ix, 1890).....                                               | 517                  |
| And Steel Sheets, Preparing, for Galvanising. (P) Davies. (viii, 1889).....                                   | 898                  |
| And Steel Slag, Production of Alkalis from. (P) Twynam. (viii, 1889).....                                     | 399                  |
| And Steel, State of Carbon in. (Ledeber.) (v, 1886).....                                                      | 493                  |
| And Steel Statistics. (T.R.) (ix, 1890).....                                                                  | 568                  |
| And Steel, Sulphur in, Determin. of. (Archbutt.) (ix, 1890).....                                              | 25                   |
| And Steel, Sulphur in, Estimation of: (Campredon.) (xiv, 1895).....                                           | 889                  |
| (Haltensaur.) (x, 1891).....                                                                                  | 797                  |
| And Steel Surfaces, Coating for. (P) Thompson. From Wells. (vii, 1888).....                                   | 433                  |
| And Steel, Tempering. (P) Theodossieff. (viii, 1889).....                                                     | 548                  |
| And Steel, Treatment of, to Prevent Oxidation when Hot. (P) Lake. From Cummins and Coleman. (viii, 1889)..... | 898                  |
| And Steel Wire, Development of Manufacture of. (Bedson.) (xii, 1893).....                                     | 1038                 |
| And Tungsten Alloys, Manufacture of. (P) Guetat and Chavanne. (i, 1882).....                                  | 154                  |
| App. for Coating Hoop, with Tin. (P) Johns. (x, 1891).....                                                    | 261                  |
| App. for Coating, with Alloys. (P) Heathfield. (vi, 1887).....                                                | 509                  |
| App. for Coating, with Metals. (P) Heathfield. (vi, 1887).....                                                | 512                  |
| App. for Coating, with Zinc, &c. (P) Heathfield. (vi, 1887).....                                              | 665                  |
| Apparatus for Converting Cast, into Steel. (P) Bond and Whiteley. (ii, 1883).....                             | 330                  |
| Apparatus for Converting Crude, into Malleable Iron and Steel. (P) Becker. (ix, 1890).....                    | 627                  |
| Apparatus for Converting Crude, into Steel. (P) Book-walter. (vii, 1888).....                                 | 653                  |

## Iron—cont.

|                                                                                                |          |
|------------------------------------------------------------------------------------------------|----------|
| App. for Estimation of Sulphur in. (Blum.) (xii, 1893) ..                                      | 63       |
| Apparatus for Galvanising. (P) Jones. (xi, 1892)....                                           | 612, 614 |
| App. for Manuf. of Cast. (P) Allen and Duvy. (xiii, 1894).....                                 | 815      |
| Apparatus for Pickling Surface of. (P) Gutensohn and James. (viii, 1889).....                  | 201      |
| Apparatus for Separating. (P) Smith. (vii, 1888).....                                          | 505      |
| Apparatus for Separating, from Bones. (P) Christy and Carter. (xi, 1891).....                  | 127      |
| Apparatus for Separating, from Paper Stock. (P) Lake. From Rising and Atkins. (x, 1891).....   | 847      |
| Arsenic in, Determination of. (Gron Dahl.) (v, 1886).....                                      | 547      |
| Arsenic in Metallic, Detect. of. (Sautermeister.) (x, 1891).....                               | 949      |
| Arsenic in Pig. Determination of. (Steall.) (xiv, 1895) ..                                     | 444      |
| Arsenides and Sulphides of, Working Auriferous and Argentiferous. (P) Probert. (iv, 1885)..... | 288      |
| Articles, Examination of Tin-plated. (Pinette.) (xi, 1892).....                                | 51       |
| Balls, Fining Beer by. (Wiedring.) (xiv, 1895).....                                            | 1057     |
| Basic Linings for Dephosphorisation of Pig. (P) Junghum and Uelsmann. (i, 1882).....           | 325      |
| Baths for Troughing, &c. (P) Bates. (xiii, 1894).....                                          | 645      |
| Brittleness of, after Corrosion. (Ledeber.) (vii, 1888).....                                   | 35       |
| Carbide, Production of. (Mühlhauser.) (xiii, 1894).....                                        | 35       |
| Carbohydrate from Carbon in Cast. (Zabudsky.) (i, 1882).....                                   | 323, 388 |
| Carbon in. (Abel.) (iv, 1885).....                                                             | 284      |
| Carbon in, Determination of: (Hempel.) (xii, 1894).....                                        | 421      |
| (Volmer.) (xiv, 1895).....                                                                     | 888      |
| (Weissmann.) (vii, 1888).....                                                                  | 646      |
| (Wiborzh.) (vi, 1887), 748; (ix, 1890).....                                                    | 768      |
| (Wood.) (iii, 1884).....                                                                       | 652      |
| Carbon in, Estimation of: (Blum.) (viii, 1889).....                                            | 922      |
| (Konck.) (vii, 1888).....                                                                      | 457, 635 |
| (Ledeber.) (xiii, 1894).....                                                                   | 281      |
| Carbon in Malleable, Determination of. (Pettersson and Smith.) (xii, 1893).....                | 1061     |
| Carbon in, Methods of Estimating. (Gottig.) (xiii, 1894).....                                  | 1096     |
| Carbon in, Modifications of. (Ledeber.) (xii, 1893).....                                       | 931      |
| Carbon in, Reliability of Methods of Determining. (Gottig.) (xiii, 1894).....                  | 421      |
| Carbon in, Volum. Determ. of. (Wiborzh.) (vii, 1888).....                                      | 235      |
| Carbon of Spiegel. (Rathke.) (x, 1891).....                                                    | 485      |
| Carbonyl. (Berthelot.) (xi, 1892).....                                                         | 909      |
| Carbonyl in Illuminating Gas. (Guntz.) (xi, 1892).....                                         | 846      |
| Carburising Fluid. (P) Stead. (xi, 1892).....                                                  | 694      |
| Cast, and Wrought, and Steel, Relative Oxidisability of. (Gruner.) (ii, 1883).....             | 283      |
| Cast, Comparative Yield of, in England and Germany. (Weinlig.) (i, 1882).....                  | 309      |
| Cast, Composition of. (Turner.) (vii, 1888).....                                               | 200      |
| Cast, Condition of Silicon in. (xiv, 1895).....                                                | 662      |
| Cast, Conversion of. (P) Reese. (ii, 1883).....                                                | 180      |
| Cast, Conversion of, into Wrought-Iron. (Lebedieff.) (xi, 1892).....                           | 245      |
| Cast, Converting, into Malleable Iron or Steel. (P) Hufly and Caldwell. (xiv, 1895).....       | 581      |
| Cast, Cooline Curves and Tests for. (Keep.) (xiv, 1895).....                                   | 889      |
| Cast, Decarburisation of. (Korting.) (i, 1882).....                                            | 457      |
| Cast, Desulphurising Molten. (x, 1891).....                                                    | 774      |
| Cast, Estimation of Silicon in. (Rabrichus.) (xii, 1893).....                                  | 868      |
| Cast, Formation of, in Zinc Muffles. (Jensch.) (xiii, 1894).....                               | 308      |
| Cast, Influence of Aluminium on. (Keep and others.) (vii, 1888).....                           | 752      |
| Cast, Influence of Phosphorus on Composition of. (Kjellberg.) (xii, 1893).....                 | 604      |
| Cast, Influence of Silicon on Properties of. (Turner.) (iv, 1885).....                         | 677, 745 |
| Cast, Manufacture of. (P) Renshaw. (x, 1891).....                                              | 553      |
| Cast, Method and Apparatus for Refining. (P) Wetter. (ii, 1883).....                           | 349      |
| Cast, Prod. of Homogeneous. (P) Lencanhez. (xiv, 1895).....                                    | 582      |
| Cast, Production of Malleable. (i, 1882).....                                                  | 71       |
| Cast, Selective Alteration of Constituents of. (Turner.) (iv, 1885).....                       | 595      |
| Cast, Silicon and Aluminium in. (Osmond.) (xi, 1892).....                                      | 242      |
| Cast, Silicon and Sulphur in. (Turner.) (vii, 1888).....                                       | 589      |
| Cast, Stirling's Toughened. (Turner.) (v, 1886).....                                           | 292      |

|-----------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------|----------|
| From Fruits, Roots, &c., Purification of. (P) Thompson.                                                   |          | Karoon, Opening of the River, in Persia. (T.R.) (ix, 1890) ..                                               | 335      |
| From Kleemann. (vii, 1888) .....                                                                          | 335      | Kath, Isolation of, from Wood of Acacia Catechu. (xiv, 1895)                                                | 464      |
| Invert Sugar in Cane. (Schweitzer.) (ix, 1890) .....                                                      | 878      | Or Pale Catechu. (Warth.) (x, 1891) .....                                                                   | 252      |
| Material for Purifying Saccharine. (P) Gregory and MacDonald. (ix, 1890) .....                            | 43       | Kau. (vi, 1887) .....                                                                                       | 561      |
| Or Liquids, Apparatus for Evap. (P) Labéric. (vi, 1887)                                                   | 554      | Kauri Copal Digging in New Zealand. (xiii, 1894) .....                                                      | 47       |
| Purifying Saccharine. (P) Engler and Becker. (vi, 1887)                                                   | 375      | Gum in Australia. (T.R.) (xii, 1893) .....                                                                  | 168      |
| Treatment of Saccharine. (P) Yates and Degener. (i, 1882) .....                                           | 289      | Gum Industry of New Zealand. (T.R.) (xiv, 1895) .....                                                       | 528      |
| Jules. (Kaiser and Reissert.) (xi, 1892) .....                                                            | 673      | Gum, Production of, in New Zealand. (T.R.) (xii, 1893)                                                      | 71       |
| Junker's Calorimeter. (Kühne.) (xiv, 1895) .....                                                          | 631      | Gum, Treating. (P) Firth. (x, 1891) .....                                                                   | 154      |
| Jurumbaba. (vii, 1888) .....                                                                              | 229, 340 | Kegs, App. for Observing Quality of Liquids in. (P) (i, 1882)                                               | 457      |
| Jute and Rhea Canes, Treatment of. (P) Dry. (viii, 1889) ..                                               | 457      | Keith System for Manufacture of Gas from Oil. (Armstrong.) (iii, 1884) .....                                | 465      |
| And Rhea, Decortication of. (P) Longmore and Watson. (ix, 1890) .....                                     | 1033     | Kellner and Soltsien Methods of Removing Bitter Alkaloids from Lapsins. (Kuhn.) (viii, 1889) .....          | 555      |
| Apparatus for Decortication. (P) Fremerey. (xii, 1893) ..                                                 | 144      | Kentucky, Agricultural Experiments at State College of. (ix, 1890) .....                                    | 309, 871 |
| Apparatus for Preparing. (P) Lawson and Dear. (x, 1891)                                                   | 540      | Kephir. (Struve.) (iii, 1884) .....                                                                         | 493      |
| As a Substitute for Guncotton. (Mühlhauser.) (xi, 1892)                                                   | 937      | And Koumiss. (ix, 1890) .....                                                                               | 887      |
| Bleaching: (P) Newton. From Actienzes. für Papier und Druck Industrie Leykam Josefthal. (vii, 1888) ..... | 624      | Kerite Compounds, Manufacture of Vulcanised. (P) Allison. From Day. (iv, 1885) .....                        | 680      |
| (Sehever.) (i, 1882) .....                                                                                | 405      | Kernel-roasting (Copper Ores), Explanation of. (Howe.) (xiv, 1895) .....                                    | 277      |
| (P) Young. (i, 1882) .....                                                                                | 231      | Kernels and Seeds, Extraction of Oils from. (Majimon.) (xiv, 1895) .....                                    | 1049     |
| Bleaching Materials made of. (P) Brégeard. (i, 1882) ..                                                   | 452      | Kerosene, Alkali Test for. (Lissenko and Stepanow.) (xiii, 1894) .....                                      | 177      |
| Butts, Manuf. of Bagging from. (P) Gratz. (ix, 1890) ..                                                   | 1034     | Cause of Diminishing Flame in Lamps Fed with Inferior. (Nakamura.) (ii, 1883) .....                         | 535      |
| Experiments on Indian. (xiv, 1895) .....                                                                  | 964      | Comparison of Russian and American. (Redwood.) (iv, 1885) .....                                             | 76       |
| Fibre, Chemical Technology of. (Cross.) (i, 1882) .....                                                   | 129      | Constituents of. (Wanklyn and Cooper.) (xii, 1894) ..                                                       | 827      |
| Fibre, Explosive Nitrates from. (Cross and Bevan.) (xi, 1892) .....                                       | 214      | Cost of Russian. (Redwood.) (iv, 1885) .....                                                                | 89       |
| Fibre Produced in England. Composition of. (Pears.) (xii, 1893) .....                                     | 599      | Fractional Distillation Illustrated by Investigation of. (Wanklyn and Cooper.) (xiii, 1894) .....           | 627      |
| Flax and Hemp Fibre, Distinction between. (Lenz.) (ix, 1890) .....                                        | 732      | Fractional Distillation of. (Nakamura.) (ii, 1883) .....                                                    | 536      |
| For the Prod. of Velvet, Utilisation of. (Pfnuhl.) (i, 1882)                                              | 183      | In Chili. (T.R.) (vii, 1888) .....                                                                          | 47       |
| Manufacture of Wall-Paper, Carpets, &c. from. (P) Sauvage. (ix, 1890) .....                               | 173      | New Russian Duty on. (T.R.) (vii, 1888) .....                                                               | 246      |
| Preservative Treatment of. (P) Truman. (x, 1891) .....                                                    | 133      | Oil-field in Sumatra. (xi, 1892) .....                                                                      | 783      |
| Process and App. for Treating. (P) Kauffmann. (vi, 1887)                                                  | 660      | Oil, Lamps for. (Alibegow and Dolinin.) (vii, 1888) ..                                                      | 112      |
| Production of, in India. (xii, 1893) .....                                                                | 598      | Oil, Use of, in India. (T.R.) (ix, 1890) .....                                                              | 777      |
| Retting. (P) Close and Roff. (xiv, 1895) .....                                                            | 801      | Oils, Safety of Commercial. (Newbury and Catter.) (vii, 1888) .....                                         | 740      |
| Tarring and Preparing. (P) Peters. (x, 1891) .....                                                        | 924      | Refining of, by Quicklime. (xiv, 1895) .....                                                                | 24       |
| Trade of the United Kingdom in 1888. (T.R.) (viii, 1889)                                                  | 841      | Shale in Australia. (T.R.) (xii, 1893) .....                                                                | 958      |
| Treatment of. (P) Longmore and Watson. (vii, 1888) ..                                                     | 206      | Shale in New South Wales. (T.R.) (xii, 1893) .....                                                          | 959      |
| Treatment of, for Manufacturing Tiles, &c. (P) Weatherdon. From Comper. (ix, 1890) .....                  | 511      | See also under Petroleum.                                                                                   |          |

| Acid Process, Use of, in Manufacture of Yeast. (Wittels-hofer.) (xiv, 1895) .....                                     | 1056     |
| Acid Treatment of Yeast. (Scheibner.) (xiv, 1895) .....                                                               | 1056     |
| Fermentation. (Cazeneuve.) (xiv, 1895) .....                                                                          | 1057     |
| Lactite, Manufacture of, as a Substitute for Bone. (P) Calender. (ix, 1890) .....                                     | 1047     |
| Lactophenine. (Thoms.) (xiv, 1895) .....                                                                              | 196      |
| Lactose and Glucose, Differentiation of. (Ruizand.) (xiv, 1895) .....                                                 | 992      |
| Effect of Lead Acetate on Titration of. (Borntrager.) (xi, 1892) .....                                                | 778      |
| Manufacture of. (P) Johnson. From Peck. (x, 1891) .....                                                               | 842      |
| Laddes, Improvements in. (P) Hildebrand. (xiv, 1895) .....                                                            | 16       |
| Laevolactic Ferment, Fermentation of Dextrose, Rhamnose, and Mannitol by. (Tate.) (xiii, 1894) .....                  | 264      |
| Laevulose, Determination of, in Mixture. (Wiechmann.) (xii, 1893) .....                                               | 620      |
| Manufacture of. (P) Pitt. From The Chemische Fabrik vormals E. Schering. (xiv, 1895) .....                            | 51       |
| Lagging for Steam Boilers. (P) Clarkson. From The Mannheimer Gummi, Gutta-Percha und Asbest Fabrik. (xii, 1893) ..... | 348      |
| Lagos, India-Rubber Industry at. (T.R.) (xiv, 1895) .....                                                             | 902      |
| Production of a New Fibre in. (ix, 1890) .....                                                                        | 1032     |
| The Produce of. (T.R.) (viii, 1889) .....                                                                             | 584      |
| Laird Bros. Shipbuilding Yard, Visit to. (xii, 1893) .....                                                            | 575      |
| Lake Pigments, Formation of. (Weber.) (xii, 1893) .....                                                               | 650      |
| Pigments, New Class of. (Weber.) (xii, 1894) .....                                                                    | 1151     |
| Lakes, Blue, Derived from Dibromogallanilide. (Cazeneuve.) (xiii, 1894) .....                                         | 1008     |
| Formation of Coloured. (Vignon.) (x, 1891) .....                                                                      | 634      |
| Formation of Pigment. (Weber.) (x, 1891) .....                                                                        | 896      |
| Lake Superior, Copper Assay at. (Hath.) (xiv, 1895) .....                                                             | 679      |
| Lambeth Palace, Visit to. (viii, 1889) .....                                                                          | 511      |
| Laminaria, Sugar from. (Bauer.) (viii, 1889) .....                                                                    | 406      |
| Lamp, Acetylene Gas. (P) Rossbach-Rousset. (xiv, 1895) .....                                                          | 1038     |
| Albo-Carbon. (Rudorff.) (i, 1882) .....                                                                               | 349      |
| Amylacetate. (Hefner.) (vii, 1888) .....                                                                              | 202      |
| For Burning Light Petroleum. (Lilienthal.) (iii, 1884) .....                                                          | 652      |
| For Constant Monochromatic Flame. (Wiley.) (xii, 1893) .....                                                          | 709      |
| For Production of Formaldehyde. (Tollens.) (xiv, 1895) .....                                                          | 592      |
| Heating Chamber of Gas. (P) Muehll. (i, 1882) .....                                                                   | 492      |
| Hydrogen Flame Test Applied to the Miner's Safety. (Clowes.) (xii, 1893) .....                                        | 326      |
| Impurities in the Amylacetate. (Von Hefner.) (x, 1891) .....                                                          | 909      |
| Incandescent Vapour. (P) Schinz. (xiii, 1894) .....                                                                   | 1052     |
| Kunberg's Petroleum. (iii, 1884) .....                                                                                | 101      |
| Laboratory for Paraffin Oil. (Irvine.) (xiii, 1894) .....                                                             | 1167     |
| Simplified Form of Magnesium. (P) Ellis. (xi, 1892) .....                                                             | 807      |
| Spirit Blast. (xi, 1892) .....                                                                                        | 457      |
| Standard Oil, for Photometry. (P) Harcourt. (vii, 1888) .....                                                         | 741      |
| Vapour, for Incandescent Mantles. (P) Siemang. (vi, 1887) .....                                                       | 562      |
| Wolf's Safety. (vi, 1887) .....                                                                                       | 282      |
| Lamps, Apparatus for Lighting Electric. (P) Desquiers. (i, 1882) .....                                                | 395      |
| Appliances for Use with Incandescence. (P) Heald. (xi, 1892) .....                                                    | 735      |
| Argand Burners for Petroleum. (P) Block and Penning. (ii, 1883) .....                                                 | 164      |
| Automatic Arrangement to Prevent Freezing of Gas. (P) Schutze. (i, 1882) .....                                        | 441      |
| Behaviour of Safety in Explosive Gaseous Mixtures. (Kammerer and Oppler.) (xii, 1893) .....                           | 1017     |
| Carbon for Electric Preparation of Plastic. (P) Friedrichs. (ii, 1883) .....                                          | 163      |
| Carbons for Electric: (P) Acheson. (xiii, 1894) .....                                                                 | 1207     |
| (P) Evans and Wynne. (iv, 1885) .....                                                                                 | 686      |
| (P) La Société à Chartemps et Cie. (v, 1886) .....                                                                    | 454      |
| (P) Redfern. From Braun. (xii, 1893) .....                                                                            | 162      |

| Industries, Official Report on. (T.R.) (xii, 1893).....                                               | 1076     | Refined, Production of. (P) Lyte. (xiii, 1894).....                                        | 644    |
| Influence of Sulphuric Acid on the Action of Water on. (Carleton-Williams.) (vi, 1887).....           | 111      | Removal of, from Musts and Wines. (Borntrager.) (xiii, 1894).....                          | 1230   |
| Interaction of Sulphide with Sulphate and Oxide of. (Hannay.) (xiii, 1894).....                       | 812      | Roessler-Edelmann Process of Desilverising. (xii, 1893).....                               | 837    |
| Keith Process for Desilvering. (Swinburne.) (xi, 1892).....                                           | 824      | Salts, Manufacture of. (P) Wilson. (iv, 1885).....                                         | 354    |
| Lead Sulphate and Lead Oxide, Treatment of Galena for Production of. (P) Macdonald. (xiii, 1894)..... | 401      | Salts, Manufacture of, and Apparatus therefor. (P) Martin. (vi, 1887).....                 | 825    |
| Litharge from Metallic, Production of. (P) Gutensohn. (xi, 1882).....                                 | 694      | Salts of Some Double. (André.) (ii, 1883).....                                             | 379    |
| Metallurgy of. (Hannay.) (xiii, 1894).....                                                            | 659      | Salts, Poisonous Action of. (Bedson.) (xiii, 1894).....                                    | 610    |
| Mines in Russia, New. (T.R.) (viii, 1889).....                                                        | 226      | Salts, Production of:                                                                      |        |
| Needed for Vitriol Chambers. (Bode.) (viii, 1889).....                                                | 774      | (P) Blenkinsop and Lyte. (viii, 1889).....                                                 | 777    |
| -Ore Waste, Utilisation of Poor. (P) Haddan. From Drouin. (i, 1882).....                              | 236      | (P) Clark. From Eyckens. (vi, 1887).....                                                   | 288    |
| Ores, Smelting and Refining. (P) Bennett. (vi, 1887).....                                             | 371      | Salts, Production of Basic:                                                                |        |
| Ores, Treatment of. (P) Fell. (xiii, 1894).....                                                       | 889      | (P) Lunge and Maxwell-Lyte. (xiii, 1894).....                                              | 734    |
| Output of, in Germany, for 1886. (viii, 1889).....                                                    | 198      | (P) Maxwell-Lyte. (viii, 1889).....                                                        | 124    |
| Oxide, Action of Magnesium Chloride on. (Voigt.) (viii, 1889).....                                    | 704      | Separating the Precious Metals from. (P) Greenway. (vi, 1887).....                         | 43     |
| Oxide, Apparatus for Dissolution of. (P) Anderson. (v, 1886).....                                     | 325      | Separation of Copper and. (Jannasch and Lesinsky.) (xiii, 1894).....                       | 67     |
| Oxide for Extracting Colours from Wine. (Cazeneuve.) (v, 1886).....                                   | 178      | Separation of, from Bismuth. (Smith and Saltar.) (xii, 1893).....                          | 605    |
| Oxide from Lead Fumes. (P) Lewis. (i, 1882).....                                                      | 349      | Separation of, from Metallic Sulphides. (P) Rossler. (i, 1882).....                        | 458    |
| Oxide, Manufacture of:                                                                                |          | Separation of, from Precious Metals. (P) Russell. (iv, 1885).....                          | 122    |
| (P) Bronner. (xii, 1893).....                                                                         | 848      | Separation of, from Silver:                                                                |        |
| (P) de Ferranti and Noad. (xiv, 1895).....                                                            | 369      | (P) Arébe. (viii, 1889).....                                                               | 960    |
| Oxide Radfinsate. (Beythien and Tollens.) (ix, 1890).....                                             | 310      | (Jannasch and Lesinsky.) (xiii, 1894).....                                                 | 66, 67 |
| Oxide, Reduction of. (Hartley.) (x, 1891).....                                                        | 467      | Separation of, from Tin and Antimony by Bromine. (Jannasch and Remmler.) (xiii, 1894)..... | 66     |
| Oxide, Volatilisation of, and Action on Glass. (Hogg.) (viii, 1889).....                              | 684      | Separation of, in Ammoniacal Solution. (Jannasch.) (xiii, 1894).....                       | 66     |
| Oxide, Yellow and Red. (Geuther.) (iii, 1884).....                                                    | 179      | Silicate, Manufacture of. (P) Claus. (ii, 1883).....                                       | 281    |
| Oxide. See also under Litharge and Red Lead.                                                          |          | Silver and Zinc, Separation and Estimation of. (Aubin.) (xi, 1892).....                    | 775    |
| Oxides, Properties of. (Bonnet.) (xiii, 1894).....                                                    | 34       | -Smelting Furnace:                                                                         |        |
| Peroxide. (Lüwe.) (viii, 1889).....                                                                   | 468      | (Clenhall.) (i, 1882).....                                                                 | 234    |
| Peroxide, Action of Ammonia Gas on. (Michael and Grandmougin.) (xiii, 1894).....                      | 37       | (P) Miskey. (iv, 1886).....                                                                | 54     |
| Peroxide, Manufacture of:                                                                             |          | -Smelting in Missouri. (Kemp.) (vii, 1888).....                                            | 503    |
| (P) Lyte. (ii, 1883).....                                                                             | 41       | Solutions for Coating Metals with. (P) Clark. From Horgan. (x, 1891).....                  | 704    |
| (P) Nael. (ix, 1890).....                                                                             | 940      | Statistics of. (T.R.) (viii, 1889).....                                                    | 71     |
| Peroxide, Preparation of, for Aniline Industry. (Minor.) (xiii, 1894).....                            | 940      | Stop-Cocks made of Alloys of. (Engler and Rupp.) (xii, 1893).....                          | 284    |
| Peroxide, Production of, for Voltaic Batteries, &c. (P) Fitz-Gerald. (vii, 1888).....                 | 37       | Sugar of, Manufacture of. (P) Lowe. (viii, 1889).....                                      | 462    |
| Phosphite and Pyrophosphite, Distinction between. (Amat.) (ix, 1890).....                             | 895      | Sulphate, Analysis of. (Benedikt.) (xi, 1892).....                                         | 181    |
| Pigments and Compounds, Manufacture of, and Apparatus therefor. (P) Hannay. (vii, 1888).....          | 330      | Sulphate for Manufacture of White Pigments. (P) Wood. (x, 1891).....                       | 149    |
| Pigments, Apparatus for Production of. (P) Charlier. (xiii, 1894).....                                | 407, 532 | Sulphate, Manufacturing, from Metallic Lead. (P) Pennington. (x, 1891).....                | 1016   |
| Pigments, Manufacture of:                                                                             |          | Sulphate Pigment, Manufacture of. (P) Macdonald. (xiii, 1894).....                         | 893    |
| (P) Burghardt. (xi, 1892).....                                                                        | 361      | Sulphate, Purification of. (P) Hannay. (viii, 1889).....                                   | 553    |
| (P) Coleman. (xii, 1893).....                                                                         | 53       | Sulphate, Treatment of. (P) Wilson and Lundy. (xiii, 1894).....                            | 746    |
| Pipe, Action of Water on. (Waller.) (x, 1891).....                                                    | 845      | Sulphide, Apparatus for Oxidising. (P) Rowan and Dawson. (xi, 1892).....                   | 829    |
| Pipes, Cause of Action of Various Waters on. (Muller.) (vii, 1888).....                               | 226      | Sulphide, Reactions of. (Lodin.) (xiv, 1895).....                                          | 807    |
| Pipes, Corrosion of, by Mortar. (Knorre.) (vii, 1888).....                                            | 123      | Sulphur in, Estimation of. (Hampe.) (x, 1891).....                                         | 486    |
| Pipes, Corrosion of, by Water. (Muller.) (vi, 1887).....                                              | 832      | Surfaces, Composition for Protecting. (P) McDougall. (xiii, 1894).....                     | 893    |
| Pipes, Destruction of. (x, 1891).....                                                                 | 683      | Technical Analysis of. (Nissenson and Neumann.) (xiv, 1895).....                           | 1063   |
| Pipes for Conveying Water. (Steiner.) (iv, 1885).....                                                 | 608      | Technical Estimation of. (Amer.) (xiii, 1894).....                                         | 280    |
| Pipes for Conveying Water, Use of. (Lecco.) (xiii, 1894).....                                         | 547      | Tetrachloride, Preparation of. (Friedrich.) (xiii, 1894).....                              | 36     |
| -Plaster, Examination of. (Kremel.) (vi, 1887).....                                                   | 567      | The World's Production and Consumption of. (T.R.) (xiv, 1895).....                         | 296    |
| Poisoning. (i, 1882).....                                                                             | 198      | -Tin Alloys, Fusing Points of Remelted. (Wiesengrund.) (xiv, 1895).....                    | 39     |
| Poisoning among Glass Polishers. (xii, 1893).....                                                     | 285      | -Tin and Lead-Antimony Alloys, Comparative Valuation of. (Richards.) (xiv, 1895).....      | 304    |
| Poisoning by Water. (viii, 1889).....                                                                 | 912      | Trade in. (T.R.) (xi, 1892).....                                                           | 80     |
| Poisoning, Low Forms of Life Safe from. (Hogg.) (xiv, 1895).....                                      | 344      | Trade, Neglect of Precautionary Methods in the. (i, 1882).....                             | 216    |
| Poisonous Effect of, on Plants. (Nobbe, Baessler, and Will.) (iv, 1885).....                          | 461      | Trade, Statistics of the. (T.R.) (xiv, 1895).....                                          | 90     |
| Porous Finely Subdivided, Production of. (P) Thompson. From Correns. (xii, 1893).....                 | 362      | Treating Oxidised or Corroded. (P) Lake, From Abbé. (xii, 1893).....                       | 274    |
| Pots for Melting and Desilverising. (P) Ridley. (v, 1886).....                                        | 167      | Treatment of Ores to Obtain. (P) MacArthur and Forrest. (vii, 1888).....                   | 359    |
| Preparation of Samples of, for Assay. (Pattinson.) (xi, 1892).....                                    | 321      | Use of "Chemical." (Carulla.) (xii, 1893).....                                             | 15     |

| Action of, on Caustic, on Effluent Water. (Scrieb.) (vii, 1888).....                                            | 862  |
| Action of, in Rendering Clay Flocculent. (Sachse and Becker.) (xiii, 1894).....                                 | 409  |
| Action of, in the Dye-Bath. (Becke.) (v, 1886).....                                                             | 531  |
| Action of, on Milk, on Metals. (Schmeller.) (v, 1886).....                                                      | 493  |
| Action of, on Raffinose. (Lindet.) (ix, 1890).....                                                              | 748  |
| Action of, on Salts of Ammonia, &c. (Lunge.) (ii, 1883).....                                                    | 514  |
| And Cement, Manufacture of. (P) Mathey. (v, 1886).....                                                          | 328  |
| And Cements, Manufacture of. (P) Heys. (viii, 1889).....                                                        | 120  |
| And Cements, Shaking. (Le Chatelier.) (xiv, 1895).....                                                          | 575  |
| And Chlorine, Interaction of. (Veley.) (xiii, 1894).....                                                        | 250  |
| And Copper Sulphate, Effect of, on Mildew. (Millardet and Gayon.) (v, 1886).....                                | 169  |
| And Magnesia in Plants. (Raumer.) (iii, 1884).....                                                              | 322  |
| And Mortar. (Letac and Vivien.) (xii, 1893).....                                                                | 1036 |
| And Phosphoric Acid in Bone Dust, Ratio between. (Looker-Canapane.) (vii, 1888).....                            | 222  |
| And of Sulphurous Acid for Preventing Mould during Malting, Use of. (xiv, 1895).....                            | 173  |
| Apparatus for Burning:                                                                                          |      |
| (P) Taylor. (xi, 1892).....                                                                                     | 749  |
| (P) Tullee. (vii, 1888).....                                                                                    | 325  |
| App. for Calcining Hydraulic. (P) James. (ix, 1890).....                                                        | 73   |
| Apparatus for Decomposing Ammoniacal Salt Solutions by means of. (P) Rube, Engelcke, and Krause. (i, 1882)..... | 67   |
| Apparatus for Drying and Burning. (P) Felner and Ziegler. (xii, 1893).....                                      | 509  |
| Apparatus for Manufacture of Chloride of. (P) Milnes. (xi, 1892), 907; (xiii, 1894), 1059                       |      |
| Apparatus for Obtaining. (P) Bull. (xii, 1893).....                                                             | 262  |
| Apparatus for Preparing, for Treating Sewage. (P) Knowles. (ix, 1890).....                                      | 97   |
| Apparatus for Preparing Milk of. (P) Johnson and Hutchinson. (v, 1886).....                                     | 423  |
| Apparatus for Revivifying Gas, &c. (P) Yeaton and Adgie. (xii, 1893).....                                       | 348  |
| App. for Treating Water with. (P) Howatson. (v, 1886).....                                                      | 39   |
| App. for Turning. (P) Marshall and Bluhm. (xii, 1893).....                                                      | 667  |
| As a Disinfectant. (Liborius.) (vii, 1888).....                                                                 | 333  |
| As Flux, Experiments on Blast Furnace with. (Cochrane.) (viii, 1889).....                                       | 890  |
| Bisulphite of, Use of, in Manufacture of Sugar. (i, 1882).....                                                  | 512  |
| Borates of, Treatment of. (P) The Borax Company, Limited. (x, 1891).....                                        | 367  |
| -Burning, and Kilns therefor. (P) Bishop. (ix, 1890).....                                                       | 944  |
| -Burning, Chamber Ovens for. (P) Arnold. (i, 1882).....                                                         | 233  |
| Carbolate of, Manufacture of. (P) Austin. (iv, 1885).....                                                       | 240  |
| Carbonate of, Analyses of Recovered. (Chance.) (vii, 1888).....                                                 | 170  |
| Carbonate of, from Chloride Liquors. (P) Wigg. (vii, 1888).....                                                 | 626  |
| Carbonate of, Separation of Liquid from Waste. (P) Bolton and Wyde. (ii, 1883).....                             | 380  |
| Carbonate of, Util. of Impure. (P) Stedman. (viii, 1889).....                                                   | 778  |
| Carbonate of, Utilising Waste, in Manufacture of Cement. (P) Hill. (xiii, 1894).....                            | 255  |
| Carbonate of. See also under Calcium Carbonate.                                                                 |      |
| Caustic, as an Explosive. (Storey.) (i, 1882).....                                                              | 369  |
| Caustic, Use of, in the Blast Furnace. (Bell.) (xiii, 1894).....                                                | 954  |
| Cement, &c., Continuous Kilns for. (P) Bauchère. (xiv, 1895).....                                               | 486  |
| Chemical Constitution of Chloride of. (Lunge and Naef.) (ii, 1883).....                                         | 327  |
| Chloride of, and Analogous Compounds. (Lunge and Naef.) (ii, 1883).....                                         | 279  |
| Chloride of, and Chloride of Lithia. (Kraut.) (i, 1882).....                                                    | 486  |
| Chloride of, Application of, for Bleaching Purposes. (P) Lunge. (iv, 1885).....                                 | 494  |
| Chloride of, Determining Value of. (Lunge.) (v, 1886).....                                                      | 391  |
| Chloride of, Disinfecting Action of. (Nissen.) (ix, 1890).....                                                  | 643  |
| Chloride of, Expts. on. (Boyer and Lurand.) (x, 1891).....                                                      | 925  |
| Chloride of, Manufacture of:                                                                                    |      |
| (P) Opl. (iii, 1884).....                                                                                       | 108  |

| Determination of. (Reitmar.) (viii, 1889).....                                                         | 821  | Purifying Sewage by, with a Salt of Iron. (P) Lockwood. (xii, 1893).....                         | 371                  |
| Determination of, in Gun Cotton. (Schjerning.) (xii, 1893)...                                          | 62   | Raffinose of. (Beythien and Tollens.) (ix, 1890).....                                            | 310                  |
| Determination of, in Presence of Carbonates. (Lunge.) (i, 1882).....                                   | 55   | Rapid Method of Estimating, in Schaffner Liquors. (Chance.) (ii, 1883).....                      | 210                  |
| Disinfecting Latrines by. (Pfuhl.) (ix, 1890).....                                                     | 643  | Refuse, Treatment of, and Apparatus therefor. (P) Hargreaves and Robinson. (ix, 1890).....       | 290                  |
| Disinfection of Town Sewage Water by. (Pfuhl.) (xii, 1893).....                                        | 539  | Removal of Sugar from Molasses by. (Lefranc.) (vii, 1888).....                                   | 334                  |
| Dissolving, out of Calcareous Minerals. (P) Cahen. (iv, 1885).....                                     | 117  | Removing, from Hides and Skins. (P) Hauff. (ix, 1890)...                                         | 85; (xiv, 1895), 170 |
| Employment of Basic Phosphate of, in Fodder. (Cohn.) (iv, 1885).....                                   | 231  | Removing Sulphate of, from Solutions of Starch Sugar. (P) Knuhheim and Co. (i, 1882).....        | 30                   |
| Extracting Sugar from Molasses by. (Degner.) (iii, 1884)...                                            | 323  | Rendering, Weatherproof. (Fischer.) (ii, 1883).....                                              | 178                  |
| Freeing Skins, &c. from. (P) Hauff. (viii, 1889).....                                                  | 809  | Residue, Plaster of Paris from. (P) Kerr. (xiii, 1894)...                                        | 888                  |
| From Gas Purifiers, Desulphurising. (P) Walker. (ix, 1890).....                                        | 49   | Saccharate. (P) Hutton. (x, 1891).....                                                           | 781                  |
| From Gasworks, Treating Spent. (P) Lake. (xiii, 1884)...                                               | 233  | Salts, German Trade in. (T.R.) (xiii, 1894).....                                                 | 1111                 |
| From Gasworks, Utilisation of Waste. (P) Ransome. (i, 1882).....                                       | 280  | Separation of, from Crude Phosphates. (P) Lake. From Winkelhofer. (ii, 1883).....                | 419                  |
| Gas-Volumetric Analysis of Chloride of. (Lunge.) (ix, 1890).....                                       | 21   | Separation of Strontia from. (Sidersky.) (ii, 1883)...                                           | 354                  |
| Hydrate of, Revivification of. (P) Reid. (iv, 1885).....                                               | 582  | Silicate, Action of Charcoal in Sugar Factories on. (Pellet and Gavalowski.) (iv, 1885).....     | 410                  |
| Hydrate of. <i>See also</i> Calcium Hydrate.                                                           |      | Sludge, Control of, from Defecation of Beet Juice. (Levy.) (xiv, 1895).....                      | 499                  |
| Impregnated with Saccharine Matter, Utilisation of. (P) (Wass.) (v, 1886).....                         | 674  | Soaps, Formation of, in Steam Generators. (Vivien.) (xii, 1893).....                             | 346                  |
| In Basic Slag, Manurial Value of Free. (Jensch.) (vii, 1888).....                                      | 332  | Solubility of, in Calcium Chloride Solutions. (Lunge.) (xi, 1892).....                           | 882                  |
| In Raw Sugar, Importance of Definite Quantity of. (Strohmeyer.) (vii, 1888).....                       | 334  | Sucrates of. (Petit.) (xii, 1893).....                                                           | 776                  |
| In Soil, Influence of, on Vegetation. (Hilgard.) (vi, 1887)...                                         | 733  | Sulphate, Apparatus for Obtaining, from Residuals. (P) Wigg and others. (v, 1886).....           | 536                  |
| In Soils, Estim. of. (Reverdin and Harpe.) (viii, 1889)...                                             | 735  | Sulphate, Manufacture of. (P) Lunge. (i, 1882).....                                              | 232                  |
| In Tanning Materials. (Petrowsky.) (viii, 1889).....                                                   | 992  | Sulphate, Obtaining from Residual Liquors. (P) Wigg, Steele and Wieg. (v, 1886).....             | 31                   |
| Infl. of, on Distillation of Coal. (Knublauch.) (vi, 1887)...                                          | 503  | Sulphate of, in Cement. (Rigby.) (ix, 1890).....                                                 | 254                  |
| -Kiln Gases, Analysis of. (Chance.) (vii, 1888).....                                                   | 171  | Sulphate of, Manufacture of. (P) Johnson. From Journet. (iii, 1884).....                         | 30                   |
| -Kiln, Sublimate deposited in Gas Delivery Tube of. (Gintl.) (iii, 1884).....                          | 520  | Sulphate of, Production of. (P) Campbell and Boyd. (ix, 1890).....                               | 508                  |
| -Kilns:                                                                                                |      | Sulphate of, Utilisation of. (P) Farnell and Simpson. (vii, 1888).....                           | 323                  |
| (P) Dawson. From Quarez Freres. (xiii, 1894)....                                                       | 1062 | Sulphate, Preparation of, for Paper-making. (P) Knowles. (iv, 1885).....                         | 610                  |
| (P) Solvay. (vii, 1888).....                                                                           | 676  | Sulphate of. <i>See also under</i> Gypsum and Calcium Sulphate.                                  |                      |
| -Kilns, Construction of. (P) Schott. (ii, 1884).....                                                   | 519  | Sulphite, Manufacture of. (P) Powell. (iii, 1884).....                                           | 107                  |
| -Kilns, Recovering Carbonic Acid Gas from. (P) Walker. (xi, 1892).....                                 | 686  | Sulphites and Bisulphites of, Manufacture of. (P) Hatschek. (xii, 1893).....                     | 926                  |
| -Light, Jet Apparatus for. (P) Kershaw. (xii, 1893).....                                               | 746  | Superphosphate of, Manuf. of. (P) Prentice. (xiii, 1894)...                                      | 250                  |
| Limit of Decomposition of Sodium Carbonate by Means of. (Lunge and Schmid.) (v, 1886).....             | 240  | Superphosphates of, Obtaining Pure and Rich. (P) Packard. (iv, 1885).....                        | 290, 299, 300        |
| Manufacture of:                                                                                        |      | Tar Compound for Manure, Prep. of. (P) Koch. (i, 1882)...                                        | 414                  |
| (P) Blyth. (xiv, 1895).....                                                                            | 659  | Tartrate of, in Lyes. Recovery and Treatment of. (P) Martignier. (x, 1891).....                  | 253                  |
| (P) Kemp. (iii, 1884).....                                                                             | 107  | Treating Water with. (Macnab and Beckett.) (v, 1886)...                                          | 267                  |
| Manuring Experiments with Precipitated Phosphate of. (iv, 1885).....                                   | 469  | Treatment of Beetroot Juice with. (Beaudet.) (xiv, 1895)...                                      | 977                  |
| Means for Removing, from Skins, &c. (P) Hauff. (viii, 1889)...                                         | 124  | Treatment of Waste, to Obtain Calcium Sulphide. (P) Heslop. (ii, 1883).....                      | 177                  |
| Mixtures for Production of Artificial Stone, Manufacture of. (P) Weekwarth and Hoeft. (xiv, 1895)..... | 577  | Use of, in Manufacture of Gas. (Leybold.) (vii, 1888)...                                         | 113                  |
| Mud, Analysis of Recovered, by Schaffner-Hellbig Process. (ii, 1883).....                              | 208  | Wash for Wood and Stone. (ii, 1883).....                                                         | 183                  |
| Mud, &c., Manipulation of. (P) Bolton and Bullough. (viii, 1889).....                                  | 779  | Water. (Goldammer.) (v, 1885).....                                                               | 450                  |
| Mud, Manufacture of, into Cement. (Rigby.) (vii, 1888)...                                              | 301  | Waters, Influence of, in Wool-dyeing. (Becke.) (v, 1886)...                                      | 530                  |
| Mud, Manufacture of Whiting and Cement from. (P) Rigby. (vii, 1888).....                               | 568  | Zirconia as a Substitute for, for Lighting. (Kochs.) (x, 1891).....                              | 37                   |
| Mud, Obtaining Useful Products from. (P) Hutchinson. (x, 1891).....                                    | 787  | <i>See also under</i> Quicklime.                                                                 |                      |
| Mud Refuse, Use of, for Cement. (P) Rigby. (viii, 1889)...                                             | 462  | Limes and Lemon Juices, Preservation of. (P) Rose. (xiv, 1895).....                              | 184                  |
| Mud Residue of Ammonia-Soda Process, Utilisation of. (P) Rigby. (viii, 1889).....                      | 620  | Apparatus for Burning Materials for Hydraulic. (P) de Navarro. (xiv, 1895).....                  | 577                  |
| Mud, Treatment of Alkaline. (P) Simpson and Farnell. (i, 1882).....                                    | 321  | Cultivation in the West Indies. (T.R.) (xiii, 1894).....                                         | 849                  |
| Obtaining Acetic Acid from Pyroligne of. (P) von der Linde. (xiv, 1895).....                           | 573  | Essential Oil of. (Barrett.) (x, 1891).....                                                      | 106                  |
| Osmose Process of Duhrnfaul Applied. (Puydt.) (ii, 1883)...                                            | 387  | Juice: Its Properties and Uses. (Conroy.) (ii, 1883).....                                        | 426                  |
| Ovens for Burning. (P) Burghardt. (i, 1882).....                                                       | 189  | Juice Manufacture in Jamaica. (T.R.) (xi, 1892).....                                             | 783                  |
| Part Played by, in Germination of Seeds. (Liebenberg.) (ii, 1883).....                                 | 351  | Juices, Production of. (T.R.) Galbraith. (xiii, 1894).....                                       | 184                  |
| Permanganate of, as a Water Steriliser. (Bordas.) (xiv, 1895).....                                     | 767  | Leaves, Essential Oil of. (Watts.) (v, 1886).....                                                | 436                  |
| Phosphate of, and Sodium Sulphate, Preparation of. (P) Brunner and Zanner. (xi, 1892).....             | 816  | Treatment of Hydraulic. (Jorgensen.) (ix, 1890).....                                             | 74                   |
| Phosphate, Apparatus for Enriching. (P) Cnjo. (x, 1891)...                                             | 128  |                                                                                                  |                      |
| Phosphate, Manufacture of Precipitated. (P) Weldon. From Lombard. (iii, 1884).....                     | 259  |                                                                                                  |                      |
| Phosphate, Obtainment of Concentrated. (P) Simpson. (x, 1891).....                                     | 255  |                                                                                                  |                      |
| Phosphate of, in Russia. (T.R.) (viii, 1889).....                                                      | 141  |                                                                                                  |                      |

## Liquids—cont.

|                                                                                                                      | PAGE                 |
|----------------------------------------------------------------------------------------------------------------------|----------------------|
| Apparatus for Absorption of Gases by. (P) Edwards. From Lunge and Rohrmann. (vi, 1887).....                          | 597                  |
| Apparatus for Absorption of Gases or Vapours by. (P) Edwards. From Rohrmann and Miller. (v, 1886)....                | 423                  |
| Apparatus for Aerating. (P) Stone. (xiii, 1894).....                                                                 | 655                  |
| Apparatus for Ascertaining the Specific Gravity of. (P) Hicks. (viii, 1889).....                                     | 310                  |
| Apparatus for Boiling and Evaporating Sugar and other. (P) Fletcher and Mathew. (viii, 1889).....                    | 471                  |
| Apparatus for Burning. (P) Mills. From Seigle-Goujon. (x, 1891).....                                                 | 244                  |
| Apparatus for Carbonating. (P) Riley. (iv, 1885).....                                                                | 535                  |
| Apparatus for Charging, with Carbonic Acid Gas: (P) Foster. (vi, 1887).....                                          | 547                  |
| (P) Levinstein. (v, 1886).....                                                                                       | 36                   |
| Apparatus for Charging, with Gases. (P) Minto. (xi, 1892).....                                                       | 596                  |
| Apparatus for Clarifying: (P) Dervaux. (xi, 1892).....                                                               | 451                  |
| (P) Thorp. (x, 1891).....                                                                                            | 990                  |
| Apparatus for Clearing and Purifying: (P) Lipscombe. (viii, 1889).....                                               | 563                  |
| (P) Peschges. (xii, 1893).....                                                                                       | 1014                 |
| Apparatus for Concentrating: (P) Carulla. (xii, 1893).....                                                           | 811                  |
| (P) Deacon. From Maxwell. (xi, 1892).....                                                                            | 830                  |
| (P) Foulis. (iv, 1885).....                                                                                          | 242                  |
| (P) Guttman. (xii, 1893).....                                                                                        | 1014                 |
| (P) Roeckner. (ix, 1890).....                                                                                        | 921                  |
| (P) Thompson. From Wirth. (x, 1891).....                                                                             | 750, 750             |
| Apparatus for Condensation of Gases by. (Lunge and Rohrmann.) (vi, 1887).....                                        | 538                  |
| Apparatus for Condensing or Heating. (P) Klein. (ix, 1890).....                                                      | 849                  |
| Apparatus for Containing Volatile Inflammable. (P) Dilletot. (xi, 1892).....                                         | 806                  |
| Apparatus for Continuous Evaporation of: (P) Egells. (iii, 1884).....                                                | 469                  |
| (P) Harlock. (xiii, 1894).....                                                                                       | 23                   |
| Apparatus for Controlling Flow of. (P) Wendt. (xii, 1893).....                                                       | 134                  |
| Apparatus for Conveying. (P) Rylands and Horner. (x, 1891).....                                                      | 36                   |
| Apparatus for Cooling: (P) Bonlt. From Fischer. (vii, 1888).....                                                     | 554                  |
| (P) Elworthy. (xi, 1892).....                                                                                        | 260                  |
| (P) Popper. (ix, 1890).....                                                                                          | 168                  |
| (P) Price. (xiii, 1894).....                                                                                         | 1043                 |
| (P) Webb. (xiii, 1894).....                                                                                          | 378                  |
| (P) Webb and Siddeley. (xii, 1893).....                                                                              | 615                  |
| Apparatus for Cooling and Evaporating. (P) Worsam. (xiii, 1894).....                                                 | 269                  |
| Apparatus for Cooling, by Air. (ix, 1890).....                                                                       | 1024                 |
| Apparatus for Cooling, Heating, and Drying. (P) Shaw and Rushton. (xi, 1892).....                                    | 230                  |
| Apparatus for Cooling or Heating. (P) Reichling. (viii, 1889).....                                                   | 869                  |
| Apparatus for Cooling or Warming. (P) Baker. (xiii, 1894).....                                                       | 713                  |
| Apparatus for Decomposition of. (P) Baily and Guthrie. (xiii, 1894).....                                             | 818                  |
| Apparatus for Determining Sp. Gr. of. (Raikow and Prodonaw.) (vi, 1887).....                                         | 147                  |
| Apparatus for Disinfecting, by Electrolysis. (P) Hermite and others. (vii, 1888).....                                | 764                  |
| Apparatus for Distillation and Purification of Ammoniacal. (P) Chevalet. (vi, 1887).....                             | 597                  |
| Apparatus for Distilling: (P) Cotton and Garrett. (xi, 1892).....                                                    | 148                  |
| (P) Fouché. (xiii, 1894).....                                                                                        | 714                  |
| (P) Lake. From Mallet and Pagniez. (iv, 1885)....                                                                    | 195                  |
| (P) Lawrence and Garton. (ix, 1890).....                                                                             | 43                   |
| (P) Morris and Edney. (xiii, 1894).....                                                                              | 504                  |
| Apparatus for Distilling, Separating, &c., Mixed. (P) Barbier. (xii, 1893).....                                      | 602                  |
| Apparatus for Distributing, over Surfaces. (P) Claus. (v, 1886).....                                                 | 94                   |
| Apparatus for Drawing off and Transporting Sterilised. (P) Imray. From Calbers, Fitz, and Consorten. (xi, 1892)..... | 173                  |
| Apparatus for Drawing off Viscous. (P) Sack. (ix, 1890).....                                                         | 849                  |
| Apparatus for Drying. (P) Beyer. (xiv, 1895).....                                                                    | 13                   |
| Apparatus for Electrolytic Treatment of. (P) Browne. (xii, 1893).....                                                | 1043                 |
| Apparatus for Electrolytic Treatment of Sewage and other Impure. (P) Webster. (vii, 1888).....                       | 764                  |
| Apparatus for Evaporating: (P) Fletcher. (vii, 1888).....                                                            | 686                  |
| (P) Forstreuter. (xii, 1893).....                                                                                    | 662                  |
| (P) Foster. (x, 1891).....                                                                                           | 683                  |
| (P) Garton and Lawrence. (ix, 1890).....                                                                             | 727                  |
| (P) Gantt and Clapp. (viii, 1889).....                                                                               | 868                  |
| (P) Harburn. (x, 1891).....                                                                                          | 684                  |
| (Hempel.) (ix, 1890).....                                                                                            | 105                  |
| (P) Laberie. (vi, 1887).....                                                                                         | 554                  |
| (P) McNeil. (xiv, 1895).....                                                                                         | 172                  |
| (P) McPhail and Simpson. (xiv, 1895).....                                                                            | 351                  |
| (P) Mirrlees and Ballingall. (xi, 1892).....                                                                         | 895 (xii, 1893)..... |
| (P) Morison. (ix, 1890).....                                                                                         | 593                  |
| (P) Morrell and Fromherz. (xiii, 1894).....                                                                          | 377                  |

## Liquids—cont.

| Apparatus for Evaporating—cont. (P) Peake. (xiii, 1894).....                                           | 39                       |
| (P) Robertson and Ballingall. (x, 1891).....                                                           | 821                      |
| (P) Slater. (viii, 1889).....                                                                          | 970                      |
| (P) Theisen. (ix, 1890).....                                                                           | 922                      |
| (P) Wahl. (i, 1882).....                                                                               | 219                      |
| (P) Watson and Robertson. (viii, 1889).....                                                            | 530, 531; (x, 1891)..... |
| (P) Wild. (x, 1891).....                                                                               | 127                      |
| (P) Wilson. (x, 1891).....                                                                             | 822                      |
| Apparatus for Evaporating and Cooling. (P) Scott. (xiii, 1894).....                                    | 23                       |
| Apparatus for Evaporating, by Steam. (P) Latham and Guyot. (xiii, 1894).....                           | 713                      |
| Apparatus for Evaporating Saccharine: (P) Herbst. (i, 1882).....                                       | 415                      |
| (P) Stewart. (xi, 1892).....                                                                           | 1018                     |
| Apparatus for Examining, by Transmitted Light. (P) Lovibond. (vii, 1888).....                          | 234                      |
| Apparatus for Expelling, from Solids. (P) Price. (ix, 1890).....                                       | 593                      |
| Apparatus for Expressing. (P) Lake. From La Société Anonyme de Compresseur Jourdan. (xi, 1891).....    | 1017                     |
| Apparatus for Extracting: (Holde.) (xi, 1892).....                                                     | 939                      |
| (Karbatow.) (xiii, 1894).....                                                                          | 978                      |
| Apparatus for Filtering: (P) Birch. (x, 1891).....                                                     | 61; (xi, 1892).....      |
| (P) Capillary. (x, 1891).....                                                                          | 239                      |
| (P) Drummond. (xiii, 1894).....                                                                        | 377                      |
| (P) Mackay. (x, 1891).....                                                                             | 328                      |
| (P) Santurio. (xii, 1893).....                                                                         | 660                      |
| (P) Thompson. From Stehlik. (x, 1891).....                                                             | 448                      |
| (P) Thompson. From Williamson. (xi, 1892).....                                                         | 500                      |
| (P) Vassel. (ix, 1890).....                                                                            | 273                      |
| (P) Vickess. (vi, 1887).....                                                                           | 537                      |
| Apparatus for Filtering Alcoholic and Gaseous. (P) Gehrke. (xi, 1892).....                             | 833                      |
| Apparatus for Filtering, under Pressure. (P) Krix. (xii, 1893).....                                    | 1015                     |
| Apparatus for Filtration and Purification of. (P) Bonlt. From de Mol and Wilbaux. (xiv, 1895).....     | 468                      |
| Apparatus for Forcing and Drawing. (P) Spencer and Lord. (viii, 1889).....                             | 380                      |
| Apparatus for Freezing. (P) Bowley. (xi, 1892).....                                                    | 992                      |
| Apparatus for Gauging Depth of. (P) Horley and Sedgley. (ix, 1890).....                                | 168                      |
| Apparatus for Generating Gas or Vapour from. (P) Dheyne, De Nydpruck, and De la Hault. (ix, 1890)..... | 796                      |
| Apparatus for Generating Gases from. (Thiele.) (viii, 1889).....                                       | 1010                     |
| Apparatus for Heating: (P) Browne. From Fromm and others. (v, 1886).....                               | 244                      |
| (P) Fudicker. (xiii, 1894).....                                                                        | 1181                     |
| (P) Kirkaldy. (x, 1891).....                                                                           | 990                      |
| (P) Mills. From Seigle-Goujon. (x, 1891).....                                                          | 244                      |
| Apparatus for Heating and Concentrating. (P) Kleemann. (xiii, 1894).....                               | 1048                     |
| Apparatus for Heating and Cooling: (P) Lawrence and others. (xiv, 1895).....                           | 854                      |
| (P) Richmond. (xii, 1893).....                                                                         | 742                      |
| Apparatus for Heating, by Electricity. (P) Crompton and Dowsing. (xiii, 1894).....                     | 256                      |
| Apparatus for Heating or Evaporating: (P) Herz. (xii, 1893).....                                       | 436                      |
| (P) Morison. (xiii, 1894).....                                                                         | 622                      |
| Apparatus for Heating or Vaporising. (P) Heneberg. (xiii, 1894).....                                   | 713                      |
| Apparatus for Heating under Pressure. (P) Squire. (xiv, 1895).....                                     | 13                       |
| Apparatus for Imparting Predetermined Temperature to. (P) Hearson. (xiv, 1895).....                    | 951                      |
| Apparatus for Improving Alcoholic. (P) Martin. (xii, 1893).....                                        | 941                      |
| Apparatus for Infusing Gases into. (P) Brin's Oxygen Co. and Gohle. (viii, 1889).....                  | 759                      |
| Apparatus for Maturing Alcoholic. (P) Martin. (xii, 1893).....                                         | 54                       |
| Apparatus for Measurement of the Refractive Index of Light in. (P) Fery. (xii, 1893).....              | 465                      |
| Apparatus for Mixing: (P) Boulton, Haywood, and Gabbett. (ix, 1890).....                               | 44                       |
| (P) Bradbury and Colebrook. (x, 1891).....                                                             | 990                      |
| (P) Julien. (xiii, 1894).....                                                                          | 787                      |
| Apparatus for Mixing, with Carbonic Acid. (P) Brunler and Kommenholler. (vi, 1887).....                | 599                      |
| Apparatus for Mixing, with Liquids and Solids. (P) Johnson and Hutchinson. (xi, 1892).....             | 596                      |
| Apparatus for Oxidising Oleaginous. (P) Martin. (xii, 1893).....                                       | 941                      |
| Apparatus for Passage of, through Filter Beds. (P) Bohm. (viii, 1889).....                             | 271                      |
| Apparatus for Pasteurisation of. (P) Kuhn. (viii, 1889).....                                           | 719                      |
| Apparatus for Producing and Containing Aerated. (P) Hatton. (xii, 1893).....                           | 704                      |
| Apparatus for Purification of: (P) Brownlow. (xi, 1892).....                                           | 769                      |
| (P) Ebeling. (xiv, 1895).....                                                                          | 1036                     |
| (P) Johnson. From La Société G. Boone et J. Nory. (vi, 1887).....                                      | 537                      |
| (P) Macnab. (v, 1886).....                                                                             | 368                      |
| (P) Oliphant. (viii, 1889).....                                                                        | 58                       |
| (P) Wagner and Marr. (xiii, 1894).....                                                                 | 751                      |

| (P) Stewart. (xiv, 1895)                                                                           | 15   |
| (P) Welsh and Godman. (xii, 1893)                                                                  | 134  |
| Apparatus for Separating Solid Impurities from. (P) Howatson. (iv, 1885)                           | 736  |
| Apparatus for Separating Solids from:                                                              |      |
| (P) Macnab and Donald. (vi, 1887)                                                                  | 814  |
| (P) Sawrey and Collett. (vii, 1888)                                                                | 834  |
| (P) Seaton. (viii, 1889)                                                                           | 270  |
| (P) Smith. (v, 1886)                                                                               | 387  |
| Apparatus for Separating Vapours from. (P) Murrie. (v, 1886)                                       | 468  |
| Apparatus for Separating Volatile. (P) Pontalili. (xi, 1892)                                       | 230  |
| Apparatus for Separation of, from Gases. (P) Jones. (x, 1891)                                      | 240  |
| Apparatus for Softening, &c. (P) Fitzmaurice. (xii, 1893)                                          | 55   |
| Apparatus for Sterilising:                                                                         |      |
| (P) Imray. From Calberia, Fitz, and Consorten. (xi, 1892)                                          | 258  |
| (P) Laurent. (xiv, 1895)                                                                           | 351  |
| (P) Ortmann and Herbst. (xiii, 1894)                                                               | 137  |
| (P) Thiel. (xii, 1893)                                                                             | 539  |
| (P) Trondle. (xii, 1893)                                                                           | 942  |
| Apparatus for Straining. (P) Squire. (xiv, 1895)                                                   | 791  |
| Apparatus for Subjecting, to Centrifugal Action. (P) Imray. From Berzh. (xi, 1892)                 | 337  |
| Apparatus for Supplying Carbonic Acid Gas to. (P) Hurter. (viii, 1889)                             | 719  |
| Apparatus for Supplying, to Series of Electric Batteries. (P) Jeanty. (xi, 1892)                   | 617  |
| Apparatus for Testing and Sampling. (P) Mackie. (iv, 1885)                                         | 511  |
| Apparatus for Testing Relative Volumes of Mixed. (P) Laidlaw. (x, 1891)                            | 822  |
| Apparatus for Treating:                                                                            |      |
| (P) Fryer. (x, 1891)                                                                               | 239  |
| (P) Robertson and Mirreles. (ix, 1890)                                                             | 1115 |
| (P) Wright. (ix, 1890)                                                                             | 1115 |
| Apparatus for Treating, by Gases:                                                                  |      |
| (P) Burdekin. (xii, 1893)                                                                          | 812  |
| (Hurter.) (xii, 1893)                                                                              | 227  |
| (P) Melville. (xii, 1893)                                                                          | 1013 |
| Apparatus for Treating Fibres by. (P) Miller. (xiii, 1894)                                         | 884  |
| Apparatus for Treating Gases by. (P) Edwards. From Lunze and Rohrmann. (ix, 1890)                  | 510  |
| Apparatus for Treating Granular Substances with. (P) Abel. From Langen and Hundhausen. (vii, 1888) | 835  |
| Apparatus for Treating Textiles with. (P) Mather. (viii, 1889)                                     | 460  |
| Apparatus for Vaporisation of:                                                                     |      |
| (P) Allison. From The National Salt and Chemical Co. (x, 1891)                                     | 451  |
| (P) Spencer. (xi, 1892)                                                                            | 174  |
| Apparatus for Warming or Mulling. (P) Neale. (ix, 1890)                                            | 757  |
| Apparatus for Weighing out. (Lungwitz.) (xiii, 1894)                                               | 838  |
| Apparatus to drive off Volatile Constituents of. (P) Walker. (vii, 1888)                           | 834  |
| Boiling, by Electric Current. (P) Schiff. (xii, 1893)                                              | 1042 |
| Burette Float for Opaque. (Rey.) (x, 1891)                                                         | 949  |
| Carbonating, Method for. (P) Hadden. From The Ferry Manufacturing Co. (xiv, 1895)                  | 135  |
| Carbonic Acid for Filtration of. (d'Arsonval.) (x, 1891)                                           | 717  |
| Centrifugal Apparatus for Separating:                                                              |      |
| (P) Lake. From Anderson. (vii, 1888)                                                               | 834  |
| (P) Marks. From Société E. Wauquier et Fils. (xiv, 1895)                                           | 641  |
| Charcoal for Purifying, Manufacture of. (P) Burns. (vi, 1887)                                      | 515  |
| Charging and Combining, with Carbonic Acid Gas. (P) Lake. From Adam. (xiv, 1895)                   | 291  |
| Charging and Sealing Vessels containing. (P) Macnab and Dickson. (xiii, 1894)                      | 929  |
| Charging, with Carbonic Acid Gas. (P) Landerer. (xii, 1893)                                        | 538  |
| Charging, with Gas. (P) Lake. From Catlin, Sweetland, and Cox. (ix, 1890)                          | 44   |
| Charging, with Gases. (P) Schneible. (xiv, 1895)                                                   | 765  |
| Clarification and Preservation of. (P) Evans. (xiii, 1894)                                         | 827  |
| Clarifying and Filtering. (P) Hulssner and Rohrig. (xiv, 1895)                                     | 134  |
| Clarifying, Method of. (P) Roekner. (i, 1882)                                                      | 465  |
| Clarifying of Fermented. (P) Jericka and Eggmann. (viii, 1889)                                     | 472  |
| Closing Devices for Vessels containing Inflammable. (P) Daniel. (x, 1891)                          | 243  |

|                                                                                        | PAGE |

| (P) Von Puttner. (v, 1886)                                                                        | 34       |
| Reduction of Oxygen Compounds by. (Winkler.) (ix, 1890), 737; (xi, 1892), 39                      |          |
| Reduction of Silica and Boric Anhydride, by. (Tram.) (viii, 1889)                                 | 622      |
| Salicylicum. (Fischer.) (vii, 1888)                                                               | 399      |
| Solubility of, in Water Containing CO <sub>2</sub> . (Kappel.) (vi, 1887)                         | 607      |
| Strength of. (vi, 1887)                                                                           | 730      |
| Strontium and Barium Fluorides, Production of. (P) Feldmann. (vii, 1888)                          | 122      |
| Sulphate in Colouring Matters. (Witt.) (v, 1886)                                                  | 250      |
| Sulphate, Production of. (P) Enquist. (xiii, 1894)                                                | 948      |
| Sulphate Solutions, Action of, in Cement. (Michaelis.) (x, 1891)                                  | 465      |
| Sulphhydrate, for Making Sulphuretted Hydrogen. (Sisson.) (v, 1886)                               | 210, 585 |
| Magnetic Ores of Ashe County, N.C. (Nitze.) (xi, 1892)                                            | 246      |
| Oxide, Formation of, on Iron. (P) Bertrand. (xi, 1892)                                            | 694      |
| Magnetism, Generation of, by Heat. (P) Justice. Frou Acheson. (viii, 1889)                        | 901      |
| Separation of Metals by. (P) Maxim. (vi, 1887)                                                    | 515      |
| Magnolia-Bark. (Lloyd.) (vi, 1887)                                                                | 300      |
| Mahwa Flowers, as a Source of Sugar. (Elworthy.) (vi, 1887)                                       | 21       |
| Mains, Hydraulic, for Gasworks. (P) Abel. From Alavoine. (v, 1886)                                | 317      |
| Maize, Alimentary Product from. (P) Bates. (xi, 1892)                                             | 769      |
| As Brewing Material. (Schubert.) (xiv, 1895)                                                      | 172      |
| Chemical Study of, at Different Periods of Growth. (Leplay.) (i, 1882), 511; (ii, 1883), 331, 351 |          |
| Cobs, Xylose from- (Stone and Lotz.) (x, 1891)                                                    | 939      |
| Cultivation of, in Nutritive Solutions. (Heiden.) (vii, 1888)                                     | 757      |
| Experimental Cultivation of, for Fodder. (Schleh and König.) (vii, 1888)                          | 394      |
| Experiments on. (ix, 1890)                                                                        | 874      |
| Experiments with, at Agricultural Station of the Somme. (Nantier.) (iv, 1885)                     | 126      |
| Extracting Oil and Albumenoid from. (P) Allison. From Greene. (iv, 1885)                          | 459      |
| From Cameroon, Analysis of. (Schulze.) (vi, 1887)                                                 | 444      |
| Isolation of Crystallised Cane-Sugar from. (Washburn and Tollens.) (ix, 1890)                     | 748      |
| -Kernel, Proteids of the. (Chittenden and Osborne.) (xi, 1892)                                    | 701      |
| -Malt. (Baum.) (iii, 1884)                                                                        | 528      |
| Manufacture of Beer from. (x, 1891)                                                               | 719      |
| Manufacture of Starch from, in United States. (Kreigner.) (xiv, 1895)                             | 287      |
| Manufacture of Syrup and Beer from. (P) Lake. From Feroe. (v, 1886)                               | 453      |
| Manual Experiments on. (Samiek.) (ix, 1890)                                                       | 636      |
| New Article of Diet from. (P) Lake. From Cervignano. (i, 1882)                                    | 376      |
| Oil and Cotton Stearin. (Hart.) (xiii, 1894)                                                      | 257      |
| Oil of:                                                                                           |          |
| (De Negri and Fabris.) (xii, 1893)                                                                | 607      |
| (Smetham.) (xii, 1893)                                                                            | 848      |
| (Smith.) (xi, 1892)                                                                               | 504      |
| Preparation of Crystallised Cane Sugar from. (Washburn and Tollens.) (viii, 1889)                 | 557      |
| Preparation of, for Brewing, &c. (P) White. (x, 1891)                                             | 60       |
| Preparation of Yeast from. (P) Burrow. (i, 1882)                                                  | 419      |
| Presence of Potassium and Calcium Salts in. (Leplay.) (iv, 1885)                                  | 541      |
| Pulp, Drying of. (xii, 1893)                                                                      | 280      |
| Separating Seeds and Husks from. (P) Chiozza. (i, 1882)                                           | 464      |
| Silage as Fodder for Milch-Kine. (Kose.) (iv, 1885)                                               | 539      |
| Starch, Manufacture of. (von Wagner.) (iii, 1884)                                                 | 323      |
| Treating, to form Glucose. (P) Humphreys. (i, 1882)                                               | 74       |
| Treatment of. (Gent.) (vi, 1887)                                                                  | 602      |

| For Barley, Value of Phosphates as. (Pittbogen.) (iv, 1885).....                                    | 539      |
| For Beet, Ammonium Phosphate as a. (vii, 1888).....                                                 | 333      |
| For Fruit Press. (Wagner.) (vi, 1887).....                                                          | 553      |
| For Hops. (Pott.) (iv, 1885).....                                                                   | 603      |
| For Vineyards, Thomas-Slag as a. (Chambrier.) (vii, 1888).....                                      | 574      |

## Manure—cont.

|                                                                                         |                        |     |
|-----------------------------------------------------------------------------------------|------------------------|-----|
| For Wheat, Chili Saltpetre as a. (Wolff.) (viii, 1889).....                             | 404                    |     |
| Formation of Farmyard-. (Reiset.) (vii, 1889).....                                      | 554                    |     |
| From Alkali Waste. (P) Brock. (i, 1882).....                                            | 374                    |     |
| From Animal Matter, Manufacture of. (P) Davies and Mossey. (i, 1882).....               | 74                     |     |
| From Bones and Animal Waste. (P) Hobson. (viii, 1889).....                              | 292                    |     |
| From By-Products of Spirit Manufacture, Production of. (P) Manbré. (ix, 1890).....      | 881                    |     |
| From Distillers' Spent Wash. (P) Squire. (vi, 1887).....                                | 828                    |     |
| From Excreta, Manufacture of. (P) Grimshaw. (v, 1886).....                              | 246                    |     |
| From Human Excreta, Prod. of. (P) Nicholls. (ii, 1883).....                             | 288                    |     |
| From Peat Fibre. (Fleischer.) (iv, 1885).....                                           | 131                    |     |
| From Refuse, Manufacture of. (P) McGregor and McArthur. (vii, 1888).....                | 450                    |     |
| From Sewage. (P) Carter. (xiii, 1894).....                                              | 964                    |     |
| From Sewage, &c., and Apparatus therefor, Manufacture of. (P) Harland. (vii, 1888)..... | 131                    |     |
| From Sewage, Manufacture of:                                                            |                        |     |
| (P) Carter. (xii, 1893).....                                                            | 612                    |     |
| (P) Cox. (iv, 1885).....                                                                | 232                    |     |
| (P) Kidd. (iii, 1884).....                                                              | 451                    |     |
| (P) Redman and Butt. (iv, 1885).....                                                    | 232                    |     |
| From Sewage, Production of. (P) Barry. (v, 1886).....                                   | 675                    |     |
| From Sewage Sludge, Prep. of. (P) Cobley. (vii, 1887).....                              | 378                    |     |
| Hematite Slag-. (P) Pease. (xiv, 1895).....                                             | 815                    |     |
| Increasing Fertilising Power of. (P) Riddiough. (ix, 1890).....                         | 201                    |     |
| Industry, Artificial. (x, 1891).....                                                    | 811                    |     |
| Industry, History of the Chem. (Morrison.) (ix, 1890).....                              | 262                    |     |
| Influence of, on Composition of Potatoes. (Mareker.) (iv, 1885).....                    | 231                    |     |
| Iron Sulphate as a. (Griffiths.) (vi, 1887).....                                        | 374                    |     |
| Lime-Tar Compound for, Prep. of. (P) Koch. (i, 1882).....                               | 414                    |     |
| Liquors, Phosphoric Acid as Addition to. (Neuffer.) (v, 1886).....                      | 672                    |     |
| Loss of Nitrogen during Fermentation of Farmyard-. (Joulic.) (iv, 1885).....            | 460                    |     |
| Manufacture of:                                                                         |                        |     |
| (P) Gillard. (vii, 1888).....                                                           | 761                    |     |
| (P) Ginstler. (xiv, 1895).....                                                          | 171                    |     |
| (P) Roxburgh. (vi, 1887).....                                                           | 827                    |     |
| Manufacture of, at Roehdale. (Brookman.) (xiv, 1895).....                               | 340                    |     |
| Manufacture of, in United States. (T.R.) (xii, 1893).....                               | 74                     |     |
| Manufacture, Report on. (Cohn.) (T.R.) (viii, 1889).....                                | 111                    |     |
| Manufacturers, Society of German. (i, 1882).....                                        | 327                    |     |
| Market in 1890. (T.R.) (xi, 1892).....                                                  | 788                    |     |
| Means of Preserving Stable-. (Gesekus.) (vii, 1888).....                                | 127                    |     |
| Mineral, Manufacture of. (P) Redfern. From Hensei and Spithoff. (xiii, 1894).....       | 1075                   |     |
| Nitrogenous from Wastes, Prep. of. (P) Richters. (i, 1882).....                         | 414                    |     |
| Of Vines. (Muntz.) (xiv, 1895).....                                                     | 876                    |     |
| Peat-:                                                                                  |                        |     |
| (Petermann.) (vii, 1888).....                                                           | 576                    |     |
| (Schriepner-Triesdorf.) (iv, 1885).....                                                 | 409                    |     |
| Peat-Litters-:                                                                          |                        |     |
| (Gianmetti.) (viii, 1889).....                                                          | 967                    |     |
| (Wagner.) (iv, 1885).....                                                               | 539                    |     |
| Phosphates for, New Source of. (P) Neujean and Ponsink. (i, 1882).....                  | 374                    |     |
| Phosphates for, Production of. (P) Cahen. (iv, 1885).....                               | 131                    |     |
| Phosphoric Acid for Use as, Preparing. (P) Barbe. (v, 1886).....                        | 104                    |     |
| Potassium Phosphate as. (Meyer.) (xiii, 1894).....                                      | 409                    |     |
| Potassium Phosphate for, Manufacture of. (Jay and Dupasquier.) (xiv, 1895).....         | 876                    |     |
| Preparation of. (P) Hencke. (xiv, 1895).....                                            | 497                    |     |
| Prev. Loss of Ammonia from Liquid. (Mayer.) (v, 1886).....                              | 611                    |     |
| Production of. (P) Brothers. (xiii, 1894).....                                          | 409                    |     |
| Prod. of Farmyard-. (Müntz and Girard.) (vii, 1888).....                                | 577                    |     |
| Sewage Sludge for, Preparing. (P) Hardwick and Newton. (xi, 1892).....                  | 173                    |     |
| Silica as. (Kreuzhage and Wolff.) (iii, 1884).....                                      | 492                    |     |
| Special Turnip, Composition of. (Macadam.) (vii, 1888).....                             | 98                     |     |
| Stable-. (Amoynaud and Zacharewicz.) (v, 1886).....                                     | 541                    |     |
| Sulphuric Acid as. (Fresenius and Steoks.) (iv, 1885).....                              | 126                    |     |
| Superphosphates as. (T.R.) (viii, 1889).....                                            | 315                    |     |
| Superphosphatic, Manufacture of. (P) Jachne. (x, 1891).....                             | 649                    |     |
| Supersulphated Wheat, Patent. (Macadam.) (vii, 1888).....                               | 90                     |     |
| Thomas-Slag as a:                                                                       |                        |     |
| (Bredt.) (viii, 1889).....                                                              | 125                    |     |
| (Maltzan.) (v, 1886).....                                                               | 339                    |     |
| (Smith.) (v, 1886).....                                                                 | 464                    |     |
| Thomas-Slag as a, for Oats. (Emmerling.) (ii, 1888).....                                | 683                    |     |
| Thomas-Slag as Artificial. (v, 1886).....                                               | 101                    |     |
